Articles

1. GDP and the Economy: Second Estimates for the Third Quarter of 2011

Real GDP rose 2.0 percent after rising 1.3 percent in the second quarter. Consumer spending and nonresidential investment picked up. State and local government spending decreased less. Corporate profits slowed.

11. Government Receipts and Expenditures: Third Quarter of 2011

Net government saving increased \$64.6 billion to -\$1,251.0 billion. Net federal government saving increased \$102.6 billion to -\$1,172.8 billion. Net state and local government saving decreased \$38.0 billion to -\$78.2 billion.

15. Annual Industry Accounts: Revised Statistics for 2003–2010

Real GDP by industry grew 3.0 percent in 2010 after decreasing 3.5 percent in 2009. In 2010, 16 of 22 major industry groups contributed to the growth.

Director's Message

In this issue, we present updated statistics for the annual industry accounts, which detail interactions among industries and the contributions of industries to gross domestic product (GDP). According to these detailed data, in 2010, 16 of 22 major industry groups contributed to the growth of real GDP. The durable-goods manufacturing and retail trade sectors were leading contributors to the 3.0 percent increase in U.S. economic growth.

In addition, we present the second estimates of the GDP accounts for the third quarter of 2011. A separate article looks at estimates of government receipts and expenditures for the third quarter.

As the year ends, I've been reviewing our progress on meeting our strategic plan goals. And I am pleased to report that the Bureau of Economic Analysis (BEA) has made solid progress on the more than 200 elements identified in our annual strategic plan.

One area where we have made great strides is our Web site. We launched a new look-and-feel this year, embracing a more user-friendly design. We launched a new interactive tables service that allows users to easily access statistics from across BEA via a common tool. And we launched two new Twitter feeds to complement our RSS service and our e-mail subscription service. We intend to roll out additional social media services soon.

As always, the Survey will be a prime tool in communicating all developments to our users.

Happy New Year!

J. Steven Landefeld

Director, Bureau of Economic Analysis

iv December 2011

Taking Account...

BEA publishes 2009 direct investment data

The Bureau of Economic Analysis (BEA) has published two reports that present 2009 statistics covering (1) U.S. multinational companies (MNCs) and their affiliates abroad and (2) U.S. affiliates of foreign direct investors. Both volumes are available for no charge on the BEA Web site.

The report on U.S. MNCs and their affiliates presents preliminary statistics on the financial structure and operations from the 2009 Benchmark Survey of U.S. Direct Investment Abroad.

Benchmark surveys, which are conducted every 5 years, are BEA's most comprehensive survevs of U.S. direct investment abroad in terms of both the number of companies included and the subject matter. The preliminary results are based on reported or estimated data for 2,347 U.S. parent companies and 26,961 foreign affiliates (of which, 25,424 were majority owned by their U.S. parents). Every foreign affiliate was required to report data in the benchmark survey.

For U.S. parents and foreign affiliates, the financial and operating statistics from the benchmark survey extend annual statistics that begin in 1982; these annual statistics are derived from benchmark surveys and annual surveys, which are generally less detailed. In addition, the benchmark statistics will be used in preparing annual

estimates of the operations of U.S. MNCs in subsequent years.

The benchmark survey collected detailed information on the financial structure and operations of parent companies and affiliates as well as on the transactions and positions between parents and affiliates (which are not included in this report). A forthcoming comprehensive final report on the 2009 benchmark survey will include data on transactions and positions between affiliates and parents as well as data on the overall operations of affiliates and parents.

The report on preliminary statistics for U.S. MNCs and their affiliates is available at www.bea.gov/international/usdia2009p.htm.

The report on U.S. affiliates of foreign companies presents preliminary 2009 statistics that were derived by combining information reported by a sample of U.S. affiliates in BEA's annual survey of foreign direct investment in the United States with BEA estimates for affiliates not in the sample.

A U.S. affiliate is a business enterprise in which there is foreign direct investment—that is, in which a single foreign person owns or controls, directly or indirectly, 10 percent or more of the voting securities or an equivalent interest.

Following a change introduced in the 2008 annual survey, the 2009 annual survey statistics cover U.S. affiliates in all industries, including banking. Previ-

ously, bank affiliates were exempt from filing survey reports in nonbenchmark survey years. What's more, in benchmark surveys, they reported on a separate bank form that was less detailed than the forms filed by nonbank affiliates.

Thus, before the 2007 benchmark survey, all of the tabulated statistics on affiliate operations in nonbenchmark survey years as well as most of the statistics in benchmark survey years covered nonbank affiliates only. In this report, all tabulations cover both bank and nonbank affiliates.

The report on affiliates of foreign companies is available at www.bea.gov/international/fdius2009_preliminary.htm.

In addition, BEA recently posted the results of the 2007 Benchmark Survey of Foreign Direct Investment in the United States. The report includes a methodology for BEA's foreign direct investment in the United States survey program and 130 tables that present financial and operating statistics as well as direct investment position and balance of payments statistics.

The report is available at www.bea.gov/international/fdius2007_final.htm.

GDP and the Economy

Second Estimates for the Third Quarter of 2011

REAL GROSS domestic product (GDP) increased 2.0 percent in the third quarter, according to the second estimates of the national income and product accounts (NIPAs) (chart 1 and table 1). The second estimate of real GDP growth was revised down 0.5 percentage point from the advance estimate, reflecting downward revisions to inventory investment, nonresidential fixed investment, and consumer spending that were partly offset by a downward revision to imports. In the second quarter, real GDP increased 1.3 percent.

- Prices of goods and services purchased by U.S. residents increased 1.9 percent in the third quarter, 0.1 percentage point less than in the advance estimate. In the second quarter, prices increased 3.3 percent. Energy prices and food prices decelerated in the third quarter. Excluding food and energy, gross domestic purchases prices increased 1.8 percent after increasing 2.7 percent.
- Real disposable personal income (DPI) decreased 2.1 percent in the third quarter, 0.4 percentage point more of a decrease than in the advance estimate; in the second quarter, it decreased 0.5 percentage point (revised). The larger decrease reflected a sharp deceleration in current-dollar DPI, which was revised down 0.4 percentage point from the advance estimate. The downward revision to current-dollar DPI reflected a downward revision to personal income and a small upward revision to personal current taxes.
- The personal saving rate was 3.8 percent in the third quarter, 0.3 percentage point less than in the advance estimate;. In the second quarter, it was 4.8 percent (revised).
- Real gross domestic income rose 0.4 percent in the third quarter after rising 0.2 percent in the second quarter.
- Corporate profits increased \$39.8 billion after increasing \$61.2 billion. (See page 10.)

Chart 1. GDP, Prices, Disposable Personal Income (DPI)

^{1. &}quot;Real" estimates are in chained (2005) dollars, and price indexes are chain-type measures. Each GDP estimate for a quarter (advance, second, and third) incorporates increasingly comprehensive and improved source data; for more information, see "Revisions to GDP, GDI, and Their Major Components" in the July 2011 Survey of Current Business. Quarterly estimates are expressed at seasonally adjusted annual rates, which assumes that a rate of activity for a quarter is maintained for a year.

^{2.} In this article, "consumer spending" refers to "personal consumption expenditures," "inventory investment" refers to "change in private inventories," and "government spending" refers to "government consumption expenditures and gross investment."

Gross domestic income (GDI) ²		1.5	2.4	0.2	0.4				

The estimates under the contribution columns are also percent changes

The acceleration in real GDP in the third quarter primarily reflected accelerations in consumer spending and in nonresidential fixed investment, a smaller decrease in state and local government spending, a deceleration in imports, and an acceleration in exports that were partly offset by a larger decrease in inventory investment.

Consumer spending picked up. Spending for durable goods turned up, and spending for services accelerated. Spending for nondurable goods turned down.

Nonresidential fixed investment picked up, reflecting a pickup in equipment and software that was partly offset by a slowdown in structures. (See page 4.)

Inventory investment decreased more than in the second quarter and subtracted 1.55 percentage points from real GDP growth after subtracting 0.28 percentage point. (See page 5.)

Exports picked up slightly, mainly reflecting a pickup in exports of goods; exports of services slowed. (See page 6.)

Imports slowed, reflecting a slowdown in imports of goods. Imports of services accelerated. (See page 6.)

Federal government spending increased at about the same rate as in the second quarter. A slowdown in national defense spending was largely offset by a smaller decrease in nondefense spending. (See page 7.)

State and local government spending decreased less than in the second quarter. An upturn in gross investment was partly offset by a larger decrease in consumption expenditures. (See page 7.)

Real final sales of domestic product, real GDP less inventory investment, increased 3.6 percent after increasing 1.6 percent.

Motor vehicle output turned up, contributing 0.18 percentage point to real GDP growth after subtracting 0.10 percentage point.

Final sales of computers accelerated, contributing 0.22 percentage point to real GDP growth after contributing 0.07 percentage point.

Real gross domestic income (GDI), which measures the output of the economy as the costs incurred and the incomes earned in the production of GDP, increased 0.4 percent after increasing 0.2 percent.

^{1.} The estimates under the contribution columns are also percent changes.

Note. Percent changes are from NIPA table 1.1.1, contributions are from NIPA table 1.1.2, and shares are from NIPA table 1.1.10.

^{2.} GDI is deflated by the implicit price deflator for GDP. The second-quarter change reflect the incorporation of revised wage and salary estimates for the second guarter of 2011.

Note. For GDP and its components, percent changes are from NIPA table 1.2.1, contributions are from NIPA table 1.2.2, and shares are calculated from NIPA table 1.2.5. For GDI, percent changes are from NIPA table 1.7.1.

- 1. The estimates under the contribution columns are also percent changes.
- Net of expenses, or gross operating expenses less primary sales to households.
 Net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
- 4. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world: includes membership dues and fees
- Note. Percent changes are from NIPA table 2.3.1, and contributions, from NIPA table 2.3.2; shares are calculated from NIPA table 2.3.5
- NPISHs Nonprofit institutions serving households

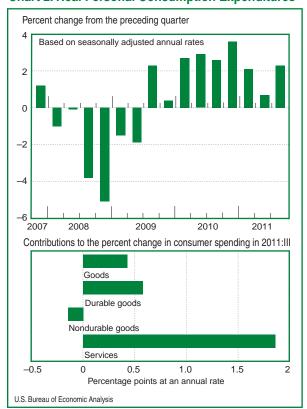

Spending for goods turned up, reflecting an upturn in spending for durable goods that was partly offset by a downturn in spending for nondurable goods.

The upturn in spending for durable goods mainly reflected an upturn in spending for motor vehicles and parts. Spending for recreational goods and vehicles and for furnishings and durable household equipment also contributed.

The downturn in spending for nondurable goods mainly reflected downturns in spending for clothing and footwear and for food and beverages for off-premises consumption that were partly offset by a smaller decrease in spending for gasoline and other energy goods.

Spending for services picked up, mainly reflecting pickups in spending for housing and utilities and for health care that were partly offset by a slowdown in spending for recreation services.

4. The authorates and outles as a state	of an extens								

- 1. The estimates under the contribution columns are also percent changes.
- Consists primarily of religious, educational, vocational, lodging, railroads, farm, and amusement and recreational structures, net purchases of used structures, and brokers' commissions on the sale of structures.
- 3. Excludes software "embedded," or bundled, in computers and other equipment.
- Includes communication equipment, nonmedical instruments, medical equipment and instruments, photocopy and related equipment, and office and accounting equipment.
- Consists primarily of furniture and fixtures, agricultural machinery, construction machinery, mining and oilfield machinery, service industry machinery, and electrical equipment not elsewhere classified.
- Consists primarily of manufactured homes, improvements, dormitories, net purchases of used structures, and brokers' commissions on the sale of residential structures.

Note. Percent changes are from NIPA table 5.3.1, contributions are from NIPA table 5.3.2, and shares are calculated from NIPA table 5.3.5.

Private fixed investment accelerated, reflecting an acceleration in nonresidential fixed investment that was partly offset by a small deceleration in residential investment.

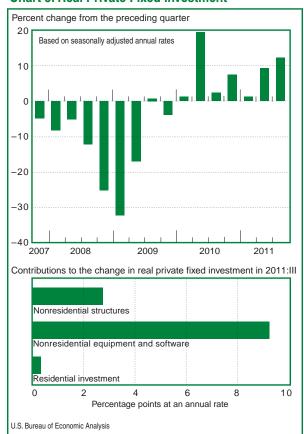

The acceleration in nonresidential fixed investment reflected an acceleration in equipment and software that was partly offset by a deceleration in structures.

The deceleration in structures reflected decelerations in mining exploration, shafts, and wells, in manufacturing, and in commercial and health care that were partly offset by an upturn in "other" structures and a pickup in power and communications.

The acceleration in equipment and software reflected upturns in "other" equipment (which includes agricultural and construction machinery) and in industrial equipment and an acceleration in transportation equipment. In contrast, information processing equipment and software slowed.

The deceleration in residential investment reflected a downturn in "other" structures (mainly in improvements) that was partly offset by an upturn in single-family structures.

of goods and structures	3.98	3.91	3.94	3.96	3.90							

- 1. The levels are from NIPA table 5.6.6B.
- 2. The residual is the difference between the first line and the sum of the most detailed lines.

3. The ratios are from NIPA table 5.7.6B.

Note. The chained-dollar series are calculated as the period-to-period change in end-of-period inventories. Quarterly changes are stated at annual rates. Because the formula for the chain-type quantity indexes uses weights of more than one period, chained-dollar estimates are usually not additive.

Inventory Investment

The change in real private inventories, often called real private inventory investment, represents the change in the physical stock of goods held by businesses. It includes finished goods, goods at various stages of production, and raw materials.

The change in private inventories is a key component of gross domestic product (GDP), which aims to measure output derived from current production. To include the value of currently produced goods that are not yet sold and to exclude the value of goods produced in previous periods, change in private inventories must be included in the GDP calculation.

Thus, GDP can also be seen as the sum of final sales of domestic product and the change in private inventories (table 2).

For most industries, the estimates of change in private inventories are prepared by revaluing book-value estimates of inventories from the Census Bureau to a replacement-cost basis and calculating the change over a quarter or a year. BEA does not always have complete data for every industry.

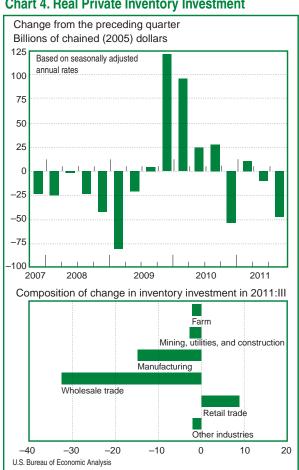

Real inventory investment decreased \$47.6 billion in the third quarter after decreasing \$10.0 billion in the second quarter.

Inventory investment in manufacturing industries decreased \$14.8 billion after decreasing \$9.1 billion; the larger decrease mainly reflected a third-quarter drawdown in nondurable-goods industries.

Inventory investment in wholesale trade turned down, reflecting a drawdown in nondurable-goods industries and a smaller third-quarter accumulation in durable-goods industries.

Inventory investment in retail trade industries increased \$8.8 billion after decreasing \$19.8 billion. The upturn mainly reflected a much smaller third-quarter drawdown by motor vehicle and parts dealers.

- 1. The estimates under the contribution columns are also percent changes.
- Exports and imports of certain goods, primarily military equipment purchased and sold by the federal government, are included in services.
- 3. Includes parts of foods, feeds, and beverages, of nondurable industrial supplies and materials, and of nondurable nonautomotive consumer goods.

Note. Percent changes are from NIPA table 4.2.1, contributions are from NIPA table 4.2.2, and shares are calculated from NIPA table 4.2.5.

International Transactions Accounts (ITAs) and NIPA Exports Excluding Gold

For the third quarter, the difference between exports in the ITAs (based on Census Bureau goods data) and the estimate of exports in GDP was sizeable because of differences in the treatment of gold exports. (See also table 9.)

In calculating GDP, the NIPAs exclude (while the ITAs include) exports and imports of gold that are not directly related to domestic production or consumption; that is, the NIPAs exclude gold that is held solely as a store of value.

For a detailed explanation of the gold adjustment in the NIPAs, see pages 8–12 and 8–13 in "Chapter 8: Net Exports of Goods and Services" of the NIPA handbook on BEA's Web at www.bea.gov.

Exports of goods and services picked up in the third quarter, reflecting a pickup in exports of goods that was partly offset by a slowdown in exports of services.

The pickup in exports of goods reflected upturns in industrial supplies and materials and in automotive vehicles, engines, and parts and a smaller decrease in "other" exports. In contrast, both nonautomotive capital goods and nonautomotive consumer goods slowed, and foods, feeds, and beverages decreased more than in the second quarter.

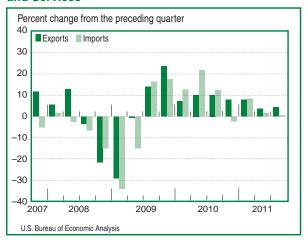

The slowdown in exports of services mainly reflected a slowdown in travel and a downturn in transfers under U.S. military agency sales contracts. In contrast, "other" transportation services turned up.

The slowdown in imports of goods and services reflected a slowdown in imports of goods that was partly offset by a pickup in imports of services.

The slowdown in imports of goods reflected downturns in nonautomotive consumer goods, in "other" imports of goods, in nonpetroleum industrial supplies and materials, and a slowdown in nonautomotive capital goods. In contrast, automotive vehicles, engines, and parts turned up sharply as supply-chain flows normalized after disruptions that resulted from the tsunami and earthquake in Japan; petroleum and products decreased less than in the second quarter.

The pickup in imports of services mainly reflected an upturn in direct defense expenditures. In contrast, "other" transportation services turned down.

Note. Percent changes are from NIPA table 3.9.1, contributions from NIPA table 3.9.2, and shares are calculated from NIPA table 3.9.5.

Government Spending

"Government consumption expenditures and gross investment," or "government spending," consists of two components: (1) consumption expenditures by federal government and by state and local governments and (2) gross investment by government and government-owned enterprises.

Government consumption expenditures consists of the goods and services that are produced by general government (less any sales to other sectors and investment goods produced by government itself). Governments generally provide services to the general public without charge. The value of government production—that is, government's gross output—is measured as spending for labor and for intermediate goods and services and a charge for consumption of fixed capital (which represents a partial measure of the services provided by government-owned fixed capital).

Gross investment consists of new and used structures (such as highways and dams) and of equipment and software purchased or produced by government and government-owned enterprises.

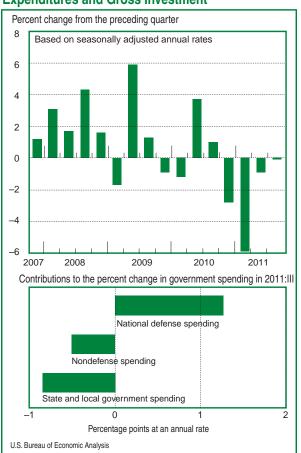

Government consumption expenditures and gross investment excludes current transactions of government-owned enterprises, current transfer payments, interest payments, subsidies, and transactions in financial assets and nonproduced assets, such as land.

Government spending decreased less in the third quarter than in the second quarter, reflecting a smaller decrease in state and local government spending.

Federal government spending increased about the same as in the second quarter. In the third quarter, a slowdown in spending for national defense was mostly offset by a smaller decrease in nondefense spending. The slowdown in national defense spending reflected a slowdown in consumption expenditures that was partly offset by upturns in gross investment in both structures and equipment and software. The smaller decrease in nondefense spending primarily reflected a smaller decrease in consumption expenditures and an upturn in gross investment in equipment and software.

The smaller decrease in state and local government spending mainly reflected an upturn in investment in structures that was partly offset by a larger decrease in consumption expenditures.

Imports	8.4	19.1	12.5	-1.3				

^{1.} The estimates under the contribution columns are also percent changes Nore. Most percent changes are from NIPA table 1.6.7; percent changes for PCE for food and energy goods and services and for PCE excluding food and energy are calculated from index numbers in NIPA table 2.3.4. Contributions are from NIPA table 1.6.8. GDP, export, and import prices are from NIPA table1.1.7.

Note on Prices

BEA's gross domestic purchases price index is the most comprehensive index of prices paid by U.S. residents for all goods and services, regardless of whether those goods and services were produced domestically or imported. It is derived from prices of consumer spending, private investment, and government spending.

The GDP price index measures the prices of goods and services produced in the United States, including the prices of goods and services produced for export.

The difference between the gross domestic purchases price index and the GDP price index reflects the differences between imports prices (included in the gross domestic purchases index) and exports prices (included in the GDP price index). For other measures that are affected by import and export prices, see the dollar depreciation FAQ Answer ID 498 on BEA's Web site.

Prices paid by U.S. residents, as measured by the gross domestic purchases price index, decelerated in the third quarter, increasing 1.9 percent after increasing 3.3 percent.

Consumer prices slowed, reflecting slowdowns in prices paid for both goods and services. The slowdown in goods prices mainly reflected a slowdown in gasoline and other energy goods and in motor vehicles and parts. In contrast, prices paid for clothing and footwear picked up. The largest contributor to the slowdown in services prices was financial services and insurance.

Prices paid for nonresidential fixed investment slowed. The largest contributor to the slowdown was a downturn in prices paid for transportation equipment.

Prices paid by government decelerated, reflecting decelerations in prices paid by both state and local governments (mainly in prices paid for consumption expenditures) and by the federal government (mainly in prices paid for national defense consumption expenditures).

Consumer prices excluding food and energy, a measure of the "core" rate of inflation, slowed slightly, increasing 2.0 percent after increasing 2.3 percent.

The GDP price index increased 2.5 percent, 0.6 percentage point more than the increase in the price index for gross domestic purchases, reflecting a decrease in import prices (1.3 percent) relative to an increase in export prices (1.9 percent).

Source Data for the Second Estimates

Personal consumption expenditures: retail sales for August and September (revised). Motor vehicle registrations for July and August (revised) and September (new). EIA data for motor vehicle fuels, lubricants, and fluids for August (revised).

Nonresidential fixed investment: construction spending (value put in place) for July and August (revised) and September (new). Manufacturers' shipments (M3) of machinery and equipment for August and September (revised). Exports and imports for July and August (revised) and September (new).

Residential fixed investment: construction spending for July and August (revised) and September (new).

Change in private inventories: manufacturers' inventories for August and September (revised) and trade inventories for August (revised) and September (new).

Exports and imports of goods and services: international transactions accounts for July and August (revised) and September (new).

Government consumption expenditures and gross investment: state and local construction spending for July and August (revised) and September (new).

The second estimate of the third-quarter increase in real GDP is 0.5 percentage point less than the advance estimate, primarily reflecting downward revisions to inventory investment, to nonresidential fixed investment, and to consumer spending that were partly offset by a downward revision to imports. The average revision (without regard to sign) between the advance estimate and the second estimate is also 0.5 percentage point.

The downward revision to consumer spending was to both services and goods. Within services, the largest contributors were "other" services and financial services and insurance. Within goods, a downward revision to nondurable goods was partly offset by an upward revision to durable goods. Within nondurable goods, the largest contributor was a downward revision to motor vehicle fuels, lubricants, and fluids. Within durable goods, the revision was more than accounted for by an upward revision to motor vehicles and parts.

The downward revision to nonresidential fixed investment primarily reflected a downward revision to equipment and software. The largest contributors to the revision were transportation equipment and information processing equipment and software.

The downward revision to inventory investment was more than accounted for by a downward revision to wholesale trade inventories.

The largest contributors to the downward revision to imports were automotive vehicles, engines, and parts, nonautomotive capital goods, and nonautomotive consumer goods.

Personal Income for the Second Quarter of 2011

With the release of the second estimates of GDP, BEA also releases revised estimates of various income-related measures for the previous quarter. This revision reflects the incorporation of newly available second-quarter tabulations from the Quarterly Census of Employment and Wages from the Bureau of Labor Statistics.

Wage and salary disbursements increased \$38.9 billion, a downward revision of \$39.8 billion. Personal current taxes increased \$30.3 billion, a downward revision of \$4.9 billion. Contributions for government social insurance, which is subtracted in calculating personal income, increased \$5.9 billion, a downward revision of \$5.4 billion.

As a result of these revisions,

- Personal income increased \$108.4 billion, a downward revision of \$37.3 billion.
- Disposable personal income increased \$78.2 billion, a downward revision of \$32.3 billion.
- Personal saving decreased \$22.4 billion, a downward revision of \$32.4 billion.
- The personal saving rate was 4.8 percent, a downward revision of 0.3 percentage point.

Profits from current production increased \$39.8 billion, or 2.1 percent at a quarterly rate, in the third quarter. In the second quarter, profits increased \$61.2 billion, or 3.3 percent.

Domestic profits of financial corporations increased \$16.0 billion, or 3.8 percent, after decreasing \$54.2 billion, or 11.5 percent.

Domestic profits of nonfinancial corporations increased \$17.4 billion, or 1.6 percent, after increasing \$80.8 billion, or 8.1 percent.

Profits from the rest of the world increased \$6.4 billion, or 1.4 percent, after increasing \$34.6 billion, or 8.4 percent. In the third quarter, receipts decreased \$7.3 billion, and payments decreased \$13.7 billion.

Taxes on corporate income decreased \$5.6 billion, or 1.3 percent, after decreasing \$1.8 billion, or 0.4 percent.

Profits after tax increased \$45.5 billion, or 3.0 percent, after increasing \$63.0 billion, or 4.3 percent.

Undistributed corporate profits (a measure of net saving that equals after-tax profits less dividends) increased \$32.2 billion, or 4.5 percent, after increasing \$49.3 billion, or 7.5 percent.

Net cash flow from current production, a profits-related measure of internal funds available for investment, increased \$39.6 billion, or 2.2 percent, after increasing \$86.2 billion, or 5.0 percent.

Measuring Corporate Profits

Corporate profits is a widely followed economic indicator used to gauge corporate health, assess investment conditions, and analyze the effect on corporations of economic policies and conditions. In addition, corporate profits is an important component in key measures of income.

BEA's measure of corporate profits aims to capture the income earned by corporations from current production in a manner that is fully consistent with the national income and product accounts (NIPAs). The measure is defined as receipts arising from current production less associated expenses. Receipts exclude income in the form of dividends and capital gains, and expenses exclude bad debts, natural resource depletion, and capital losses.

Because direct estimates of NIPA-consistent corporate profits are unavailable, BEA derives these estimates in three steps.

First, BEA measures profits before taxes to reflect corporate income regardless of any redistributions of income through taxes. Estimates for the current quarter are based on corporate earnings reports from sources including Cen-

sus Bureau Quarterly Financial Reports, Federal Deposit Insurance Corporation call reports, other regulatory reports, and tabulations from corporate financial reports. The estimates are benchmarked to Internal Revenue Service data when the data are available for two reasons: the data are based on well-specified accounting definitions, and they are comprehensive, covering all incorporated businesses—publicly traded and privately held—in all industries.

Second, to remove the effects of price changes on inventories valued at historical cost and of tax accounting for inventory withdrawals, BEA adds an inventory valuation adjustment that values inventories at current cost.

Third, to remove the effects of tax accounting on depreciation, BEA adds a capital consumption adjustment (CCAdj). CCAdj is defined as the difference between capital consumption allowances (tax return depreciation) and consumption of fixed capital (the decline in the value of the stock of assets due to wear and tear, obsolescence, accidental damage, and aging).

December 2011 11

Government Receipts and Expenditures

Third Quarter of 2011

TET GOVERNMENT saving, the difference between current receipts and current expenditures of the federal government and state and local governments, was -\$1,251.0 billion in the third quarter of 2011, increasing \$64.6 billion from -\$1,315.6 billion in the second quarter of 2011.

Net federal government saving was -\$1,172.8 billion in the third quarter, increasing \$102.6 billion from -\$1,275.4 billion in the second quarter (see page 12). Current receipts decelerated, while current expenditures turned down in the third quarter.

Net state and local government saving was -\$78.2 billion in the third quarter, decreasing \$38.0 billion from -\$40.2 billion in the second quarter (see page 13). Both current receipts and current expenditures turned down in the third quarter.

Net borrowing was \$1,471.7 billion in the third quarter, decreasing \$63.7 billion from \$1,535.4 billion in the second quarter. Federal government net borrowing was \$1,349.7 billion in the third quarter, decreasing \$99.7 billion from \$1,449.4 billion in the second quarter. State and local government net borrowing was \$122.0 billion in the third quarter, increasing \$36.0 billion from \$86.0 billion in the second quarter.

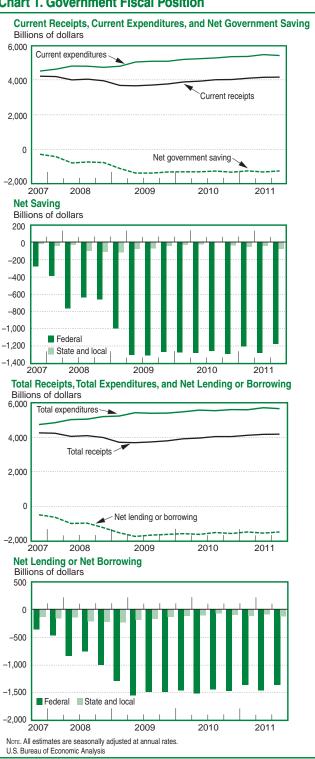

"Net lending or net borrowing (–)" is an alternative measure of the government fiscal position. Net borrowing is the financing requirement of the government sector, and it is derived as net government saving plus the consumption of fixed capital and net capital transfers received less gross investment and net purchases of nonproduced assets.

Taxes on production and imports decelerated as a result of the suspension of airline ticket taxes caused by the Federal Aviation Administration shutdown from July 23 to August 4, 2011.

National defense expenditures decelerated in the second quarter, reflecting a deceleration in spending for services and a downturn in spending for nondurable goods.

Government social benefits to persons decelerated as a result of a deceleration in benefits for social security and for Medicare.

Grants-in-aid to state and local governments turned down, reflecting a larger decrease in Medicaid grants as the Enhanced Medicaid Federal Medical Assistance Percentage (FMAP) rate was phased out. Education grants also turned down.

Other current transfer payments to the rest of the world turned down following second-quarter economic support payments to Egypt and Israel.

Interest payments turned down as a result of lower inflation expense payments on Treasury Inflation-Protected Securities.

Capital transfer payments turned down because of a downturn in capital injected into Fannie Mae and Freddie Mac. About \$6.6 billion (\$26.3 billion at an annual rate) was provided to Fannie Mae and Freddie Mac, a decrease of \$7.7 billion at an annual rate.

Federal Government Estimates

Estimates of federal government current receipts, current expenditures, and net federal government saving are based on data from the federal budget, from the *Monthly Treasury Statement* and other reports from the Department of the Treasury, and from other federal government agencies. Total receipts, total expenditures, and net lending or net borrowing, which are alternative measures of the federal fiscal position, are based on these same sources.

Quarterly and annual estimates are published monthly in NIPA table 3.2. Detailed annual estimates of these transactions by component are published annually in NIPA tables 3.4–3.8, 3.12, and 3.13. Detailed quarterly estimates are available in underlying NIPA tables at www.bea.gov/national/nipaweb/nipa_underlying/Index.asp.

Each year, BEA translates the information in the federal budget into a NIPA framework.¹ For a historical time series of these estimates, see NIPA table 3.18B, which was published in the October 2011 Survey.

^{1.} See Mark S. Ludwick and Andrea L. Cook, "NIPA Translation of the Fiscal Year 2012 Federal Budget," Survey of Current Business 91 (March 2011): 12–21.

·	16.0	1.8	2.4	3.4	3.4
	22.0	-26.7	-18.0	27.7	-36.0

Personal current taxes turned down, reflecting a downturn in income taxes.

Taxes on production and imports turned down as a result of a downturn in sales taxes.

Taxes on corporate income turned down, reflecting a deceleration in corporate profits.

Federal Grants-in-aid turned down, reflecting a larger decrease in Medicaid grants and a downturn in education grants that was driven by downturns in education grants funded by the American Recovery and Reinvestment Act and by the Education Jobs Fund.

Consumption expenditures turned down as a result of downturns in both spending for compensation for general government employees and spending for nondurable goods, particularly petroleum.

Government social benefits turned down as a result of a downturn in Medicaid benefits.

Gross government investment turned up, reflecting an upturn in structures.

Estimates of State and Local Government Receipts and Expenditures

The estimates of state and local government current receipts and expenditures and total receipts and expenditures are mainly based on compilations of data for state and local government finances. The Census Bureau produces the primary source data: the census of governments that is conducted in years that end in a 2 or a 7 and the Government Finances series of surveys for the other years. In addition, other sources of Census Bureau data are from the *Quarterly Summary of State and Local Government Tax Revenue* and the monthly *Value of Construction Put in Place*. Data sources from the Bureau of Labor Statistics include the Quarterly Census of Employment and Wages and the Employment Cost Index.

Quarterly and annual estimates are available monthly in NIPA table 3.3. Detailed annual estimates of state and local government transactions by component are available annually in NIPA tables 3.4–3.8, 3.12, and 3.13. Detailed quarterly estimates are available in underlying NIPA tables at www.bea.gov/national/nipaweb/nipa_underlying/Index.asp. For a historical time series of reconciliations of the NIPA estimates with the Census Bureau data from Government Finances, see NIPA table 3.19.

BEA also prepares annual estimates of receipts and expenditures of state governments and of local governments.¹ These estimates are available annually in NIPA table 3.20 (state government receipts and expenditures) and in NIPA table 3.21 (local government receipts and expenditures); they were published in the October 2011 Survey.

December 2011 15

Annual Industry Accounts

Revised Statistics for 2003–2010

By Teresa L. Gilmore, Amanda S. Lyndaker, Sarah J. Pack, and Simon N. Randrianarivel

THE BUREAU of Economic Analysis (BEA) released revised statistics on real gross domestic product (GDP) by industry for 2003–2010 on December 13, 2011, reflecting BEA's first "flexible" annual revision of the industry accounts. The revised statistics incorporate newly available and revised source data that are more complete than those used in the previously published statistics. In particular, the statistics for 2003–2007 incorporate revised source data from the Census Bureau's Service Annual Survey and Annual Retail Trade Survey as well as the incorporation of Federal Reserve Board price indexes for communications equipment. The reference year remains 2005.

In this issue, we present updated statistics for the annual industry accounts, which detail interactions among industries and the contributions of industries to gross domestic product (GDP). In 2010, 16 of 22 major industry groups contributed to the growth in real GDP. The durable-goods manufacturing and retail trade sectors were leading contributors to the 3.0 percent increase in U.S. economic growth.

Highlights for 2010 include the following:

- Real GDP grew 3.0 percent in 2010, following a decline of 3.5 percent in 2009. Both private goods-producing industries and private services-producing industries contributed to the growth, increasing 5.6 percent and 3.0 percent, respectively.
- Durable-goods manufacturing grew 17.0 percent in 2010 after a double-digit decline in 2009. Motor vehicles, machinery, and computer and electronic products led the recovery in durable-goods manufacturing.
- Retail trade, particularly new car dealers, grew 10.1 percent in 2010, recovering from the 2008–2009 downturn.
- The information-communications-technology-producing

1. See "Improving BEA's Accounts Through Flexible Annual Revisions," SURVEY OF CURRENT BUSINESS 88 (June 2008): 29–32.

Chart 1. Annual Growth in Real GDP

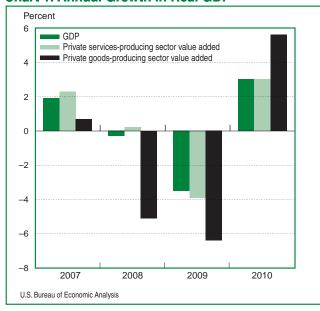

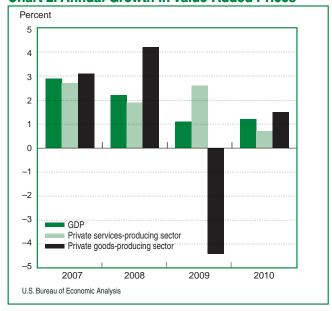

Chart 2. Annual Growth in Value-Added Prices

^{2.} If estimates for the reference year were revised, the levels of the related index numbers and the chained-dollar estimates for the entire historical period were revised; percent changes before 2003 were unrevised.

industry group returned to its previous doubledigit growth trend in 2010, growing 14.7 percent. That followed modest growth in 2009.

• Overall growth in value-added prices remained low, increasing 1.2 percent in 2010 after increasing 1.1 percent in 2009. Private goods-producing industries, led by significant upturns in the mining and agriculture industries, contributed to the acceleration.

Improvements

These estimates reflect a number of improvements in methodology and source data and are consistent with the results of the "flexible" annual revision of the national income and product accounts (NIPAs).³ The improvements did not meaningfully alter the overall picture of the economy in 2003–2010. These improvements include the following:

- •Incorporating an improved methodology for measuring wholesale trade gross output price indexes that use newly available margin price indexes from the Bureau of Labor Statistics. BEA's historical methodology used sales-based price indexes to deflate margin output. This change was made beginning with the 2008 estimates.
- •Introducing Medical Expenditure Panel Survey and private trade source data to replace the benefits-to-premiums ratio based on Economic Census data that was held constant between Economic Census years. The change was made beginning with the 2004 estimates.
- Incorporating the Annual Retail Trade Survey and the Service Annual Survey, which have been benchmarked to the 2007 Economic Census, back to 2003.
- •Incorporating improved quality-adjusted price indexes from the Federal Reserve Board's Industrial Production Index program for communications equipment, for 2003 forward, to replace indexes

based on Bureau of Labor Statistics producer price indexes and import price indexes.

The revised statistics presented in this article incorporate more accurate and more detailed information on the industry composition of GDP growth than was available for the "advance" 2010 statistics released on April 26, 2011. In particular, these updated statistics incorporate Census Bureau annual survey data on industry output, Bureau of Labor Statistics data on producer prices, and BEA statistics on final demand and revised corporate profits by industry from the 2011 flexible annual NIPA revision. For information about the principal sources of data used, see tables E and F.

For 2010, these source data were compiled for the first time within an input-output framework that balances and reconciles industry production and commodity usages. The framework provides information on value added for 65 industries and commodities (see "Methodology" on page 23). The previously published "advance" statistics for 2010 were developed from summary source data; value added was presented for 22 industry groups.

Data Availability

The annual tables for GDP by industry and the inputoutput (I-O) accounts are available on BEA's Web site. For tables for GDP by industry, online tools are available for users to customize the tables so that they show data only for the industries and years of interest. Tools are also available for creating graphs of data and downloading tables to update spreadsheets.

For I-O tables, online tools are available for users to create and store unique levels of aggregation of data for specific commodities and industries. Tools are also available for viewing and downloading entire I-O tables, including the "make" and "use" tables.

For a guide to the annual industry accounts, see "A Primer on BEA's Industry Accounts" in the June 2009 SURVEY OF CURRENT BUSINESS.

^{3.} See Eugene P. Seskin and Shelly Smith, "Annual Revision of the National Income and Product Accounts," Survey 91 (August 2011): 6–30.

Real GDP grew 3.0 percent in 2010 after declining 3.5 percent in 2009; 16 of 22 industry groups contributed to real GDP growth.

Mining decreased 6.1 percent after growing 20.9 percent; the downturn was primarily due to a sharp decline in real value added for the oil and gas extraction industry in 2010, when oil and gas production stalled.

Construction fell for the sixth consecutive year. The 3.2 percent drop was the smallest since the 3.0 percent drop in 2006. In 2010, public construction spending decreased for the first time since 1982, reflecting a sharp decline in state and local government construction.

Manufacturing rose 11.2 percent after declining for 2 consecutive years.

Durable-goods manufacturing increased 17.0 percent after declining 14.9 percent in 2009 and 1.6 percent in 2008. The main contributor to the increase was motor vehicle and parts manufacturing; both production and sales of motor vehicles increased in 2010.

Transportation and warehousing grew 3.5 percent, a sharp upturn from a 12.0 percent decline. The upturn primarily reflected an upturn in the truck transportation industry.

Management of companies and enterprises fell for the second consecutive year, primarily because of falling employment within the offices of bank holding companies.

Administrative and waste management services increased 6.4 percent, a sharp recovery from a 9.5 percent decline.

Arts, entertainment, and recreation rebounded, growing 6.5 percent after declining in 2008 and 2009.

Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.
 Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services, except government.

3. Consists of computer and electronic products; publishing industries (includes software); information and

data processing services; and computer systems design and related services.

^{1.} The estimates of gross domestic product under the contributions columns are percent changes.

The upturn in real GDP growth in 2010 was mainly due to recoveries in durable-goods manufacturing, wholesale trade, and professional, scientific, and technical services.

Mining turned down, reflecting a contraction in the oil and gas extraction industry.

Durable-goods manufacturing was the largest contributor to the upturn in real GDP; 8 of 11 durable-goods industries contributed to the growth, led by motor vehicle and parts, machinery, computer and electronic products, and fabricated metal products.

Nondurable-goods manufacturing turned up after contributing the most to the downturn in 2008 and to the continued decline in 2009. The upturn mainly reflected an upturn in petroleum and coal products.

Wholesale trade accounted for 16 percent of the upturn in real GDP growth.

Retail trade turned up after declining in 2008 and 2009.

Private services-producing industries accounted for over 70 percent of the upturn in real GDP growth, led by professional, scientific, and technical services.

Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.
 Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance,

^{3.} Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services, except government.

^{4.} Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.
Note. Percentage-point contributions do not sum to the percent change in real gross domestic product

Note. Percentage-point contributions do not sum to the percent change in real gross domestic product because the contribution of the "not allocated by industry" line is excluded.

Value-Added Prices

State and local	4.8	4.0	3.1	1.6
Addenda:				
Private goods-producing industries 1	3.1	4.2	-4.4	1.5
Private services-producing industries ²	2.7	1.9	2.6	0.7
Information-communications-technology-producing industries 3	-4.8	-3.9	-1.3	-3.4

Value-added prices for private industries slowed, reflecting a slowdown in prices for private services-producing industries that was partly offset by an upturn in prices for private goods-producing industries.

Value-added prices for agriculture, forestry, fishing, and hunting turned up, increasing 15.7 percent after falling 20.7 percent; the upturn primarily reflected strong increases in prices for crops.

Value-added prices for mining increased 19.6 percent after declining 44.7 percent; the upturn primarily reflected an increase in oil and gas extraction prices.

Construction prices fell for the first time since 1992, decreasing 2.5 percent after increasing 1.3 percent.

Value-added prices for wholesale trade turned down slightly, the first downturn since 2003.

Value-added prices for finance and insurance turned up, increasing 6.0 percent after falling 1.2 percent; the upturn primarily reflected rising output prices for Federal Reserve banks, credit intermediation, and related activities.

Value-added prices for accommodation and food services turned down slightly, the first downturn since 1955. This downturn reflected the second consecutive decline in accommodation prices and no change in prices for food services and drinking places.

Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.
 Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services, except government.

^{3.} Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services

The first "flexible" annual revision of the annual industry accounts spans estimates 2003 through 2007 and reflects the major improvements detailed on page 16. The 2008–2010 revisions reflect the incorporation of newly available data on the prices paid by industries for their intermediate inputs, revised and newly available source data used to measure industries' gross output, and revised and newly available source data used to measure corporate profits and proprietors' income by industry. These revisions did not meaningfully change the overall picture of the economy described by the previously published GDP by industry statistics.

2003-2007

• For 2003, the downward revision of 0.7 percentage point to real value added for the information industry reflected downward revisions to gross output for broadcasting and telecommunications and for information and data processing from the incorporation of data from the Service Annual Survey (SAS) that was benchmarked to the 2007 Economic Census.

- For 2003–2007, the upward revisions to real value added for durable-goods manufacturing reflected downward revisions to the gross output price index for the computer and electronic products industry that reflected the incorporation of newly available qualityadjusted price indexes for communications equipment from the Federal Reserve Board.
- For 2004, the downward revision to real value added for finance and insurance primarily reflected a downward revision to gross output of the insurance carriers industry, specifically medical and hospital insurance, which reflected a new method to measure benefits and premiums for medical and hospital insurance.

Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.
 Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food

services; and other services, except government.

3. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services. Note. The numbers under the revisions columns are percentage points

- For 2005–2006, the revisions to real value added for "other services, except government" were accounted for by revisions to both gross output and intermediate inputs, reflecting the incorporation of revised, benchmarked SAS data. The industries contributing to the revision include automotive repair and maintenance, commercial and industrial machinery and equipment repair and maintenance, business and professional organizations, and all other personal services.
- For 2007, the downward revision to real value added for finance and insurance reflected a downward revision to gross operating surplus for the securities industry.

2008-2009

• For 2008, the downward revision to real value added for durable-goods manufacturing primarily reflected

- the incorporation of newly available data on corporate profits from the Internal Revenue Service Statistics of Income.
- For 2008, the downward revision to real value added for information reflected the incorporation of newly available data on corporate profits from Statistics of Income.
- For 2008, the downward revision to real value added for the arts, entertainment, and recreation industry group primarily reflected a downward revision to the tips component of compensation for amusements, gambling, and recreational industries that reflected the incorporation of updated SAS data.
- For 2009, the downward revision to real value added for wholesale trade primarily reflected an upward revision to gross output prices due to the incorporation of newly available margin price indexes from the Bureau

Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.
 Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food

services; and other services, except government.

3. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services. Note. The numbers under the revisions columns are percentage points.

of Labor Statistics.

- For 2009, the downward revision to real value added for the mining industry reflected newly available data on corporate profits from *Statistics of Income*.
- For 2009, the upward revision to real value added for the agriculture, forestry, fishing, and hunting industry group reflected newly available data on proprietor's income for farms.
 centage points, reflecting revised measures of corporate profits.
 Real value added for management of companies and enterprises was revised down 5.8 percentage points.

2010

The revised statistics show that 16 of the 22 industry groups contributed to the increase in real GDP in 2010. In the previously published statistics, 20 of the 22 industry groups contributed to the increase in growth. The most notable revisions were upward revisions to durable-goods manufacturing and to accommodation and foods services and downward revisions to mining, to management of companies and enterprises, and to real estate and rental and leasing.

- Durable-goods manufacturing was the largest contributor to the growth in real GDP in both the previously published statistics and the revised statistics. Real value added for this industry group was revised up 7.1 percentage points, reflecting revised measures of corporate profits.
- Real value added for management of companies and enterprises was revised down 5.8 percentage points, reflecting an upward revision to the gross output price index
- Real value added for the accommodation and food services industry was revised up 5.0 percentage points, primarily reflecting revised measures of corporate profits.
- Real value added for real estate and rental and leasing was revised down 5.1 percentage points, primarily reflecting downward revisions to owner-occupied housing output and the noncorporate net interest component of value added for the real estate industry.

Acknowledgments

Nicole M. Mayerhauser, former Chief of the Industry Sector Division (ISD), and Erich H. Strassner, Chief of the Industry Applications Division (IAD), supervised the preparation of the statistics. Carol Moylan, Associate Director for Industry Economic Accounts, provided overall guidance. Thomas F. Howells III, Chief of the Input-Output Systems Branch in IAD, managed the economic information systems used to produce and review the statistics.

The following staff provided guidance and contributed to the preparation of the industry statistics and analysis: Paul V. Kern, Acting Chief of the Information and Business Services Branch in ISD, Edward T. Morgan, Chief of the Inter-Industry Statistics Branch in IAD, Kevin J. Muck, Chief of the Goods and Distributive Services Branch in ISD, and Patricia A. Washington, Chief of the Personal Services and Government Branch in ISD, Robert J. McCahill, Program Coordinator in ISD, Donald D. Kim in ISD, Gabriel W. Medeiros in IAD, and William H. Nicolls IV in IAD. Kali K. Kong, Maxine V. Tiggle and Pat A. Wilkinson provided administrative and program assistance.

The following staff also contributed to the preparation of the annual statistics:

Agriculture, mining, construction, and manufacturing:

Matthew M. Donahoe, Aaron A. Elrod, Mariana Matias, and Simon N. Randrianarivel.

Distributive services: Ricky L. Stewart, Anna M. Jacobson, Patrick H. Martin, and Justin H. Settles.

Information and professional services: Robert J. Corea, Olympia Belay, Mandy C. Roberts, and Matthew B. Schroeder.

Finance, insurance, real estate, rental and leasing, and management services: James M. Green, Lolita V. Jamison, Erin M. Ludlow, and Ricci L. Reber.

Transportation and government enterprises: Daniel W. Jackson, Alvin D. Blake and Alex Eisenmann.

Health, education, and government services: Tameka R. L. Harris, Sarah Pack, and Darlene C. Robinson-Smith.

Value added: Jennifer Lee, Teresa L. Gilmore, William A. Jolliff, and Brian M. Lindberg.

International trade and inventory: Matthew Russell, Peter D. Kuhbach, Gregory R. Linder, and Sarah B. Osborne.

Operations: Amanda S. Lyndaker, Jeffrey M. Bellone, Rajeshwari R. Bhosale, and Douglas B. Leung.

Balancing and reconciliation: Bradlee A. Herauf, Kathleen M. Karlon and Jeffrey A. Young.

Travel and Tourism Satellite Account: Paul V. Kern and Steven L. Zemanek.

Methodology

The annual input-output (I-O) accounts and the GDP by industry accounts are created using an integrated methodology that makes the annual estimates of gross output, intermediate inputs, and value added by industry more timely and more consistent than previously published estimates.¹ Industry estimates are published for 65 detailed industries that are based on the 2002 North American Industry Classification System (NAICS). Commodity estimates are published at the same level of detail as the industry estimates plus two additional commodities.² Estimates of final uses and value added are also included in the annual estimates. The integrated methodology is applied at a finer level of industry and commodity detail than the previous methodologies in order to enhance the accuracy of aggregate-level estimates.

The integrated annual I-O accounts and GDP by industry accounts are prepared in five steps:

Step one. Industry estimates of current-dollar value added for 2008-2010 are extrapolated forward from the annual industry accounts estimates for 2007 using the percent changes in the annual estimates of gross domestic income (GDI) from the national income and product accounts (NIPAs). The GDI by industry estimates consist of compensation of employees, taxes on production and imports less subsidies, and gross operating surplus. Additionally, corporate data on profits before tax, net interest, and capital consumption allowances are converted from an enterprise basis to an establishment basis using data on employment. Finally, the statistical discrepancy (the difference between GDP and GDI) is distributed among the industries. In general, annual revisions to the industry estimates of value added largely reflect revisions to the components of GDI and to the statistical discrepancy from the annual NIPA revision.

Step two. Estimates of gross domestic output for 2003–2007 are extrapolated from the 2002 estimates for select series where updated source data are incorporated as part of the "flexible" annual revision. For a complete list of source data that are revised, see table E. Estimates of gross domestic output for 2008–2010 are extrapolated from the 2007 estimates. The extrapolators for these estimates are prepared using a wide array of source data, including surveys from the Census Bureau, the Bureau of Labor Statistics, and other public and private sources.³ Annual revisions to estimates of gross output are due to revisions in these

source data.

Step three. The initial commodity composition of intermediate inputs for 2003–2009 is calculated for each industry by a process that uses the previously published intermediate input estimates and Census Bureau data on broad business expense categories by industry. In order to calculate the composition for 2010, first, gross output for each industry is revalued at the commodity prices for 2009. Next, the revalued gross output is multiplied by the industry's direct requirements coefficients from 2009. The resulting commodity estimates of intermediate inputs for the industry are revalued in the commodity prices of the 2010. As a final step, the commodity mix of detailed intermediate inputs for all years is updated to be consistent with business expense data from the Census Bureau's Service Annual Survey and Annual Survey of Manufactures.

Step four. The initial commodity composition of each GDP expenditure component for 2003-2009 is prepared using previously published expenditure estimates. The initial composition for 2010 is estimated by applying commodity-flow relationships from the revised 2002 benchmark I-O accounts to the domestic supply of each commodity in 2010. The annual I-O use tables are then balanced using a biproportional adjustment procedure to ensure that intermediate and final use of commodities is consistent with domestic supply, that intermediate use and value added are consistent with gross output and value added, and that final use is consistent with the final expenditure components from the NIPAs. The current-dollar measures of gross output, intermediate inputs, and value added are then incorporated into the GDP by industry accounts.

Step five. Price and quantity indexes for the GDP by industry accounts are prepared in three steps. First, indexes are derived for gross output by deflating each commodity produced by an industry that is included as part of its gross output. Second, indexes for intermediate inputs are derived by deflating all commodities that are consumed by an industry as intermediate inputs in the annual I-O use tables. Third, indexes for valued added by industry are calculated using the double-deflation method in which real value added is computed as the difference between real gross output and real intermediate inputs.⁵ If estimates for the reference year were revised, the levels of the related index numbers and the chained-dollar estimates for the entire historical period were revised; percent changes before 2003 were unrevised.

^{1.} See Nicole M. Mayerhauser and Erich H. Strassner, "Preview of the Comprehensive Revision of the Annual Industry Accounts," Survey of Current Business 90 (March 2010): 21–34.

^{2.} These two commodities are (1) noncomparable imports and rest of the world adjustment to final uses and (2) scrap, used and secondhand goods as the other

^{3.} The estimates of the commodity composition of extrapolated industry gross output are largely consistent with the 2002 benchmark I-O relationships for nonmanufacturing industries and with most recent survey data for manufacturing industries.

^{4.} Direct requirements coefficients specify the amount of each commodity required by the industry to produce a dollar of output.

^{5.} Estimates of gross output and intermediate inputs are combined in a Fisher index-number formula in order to generate the indexes for value added by industry. This method is preferred because it requires the fewest assumptions about the relationships between gross output by industry and intermediate inputs by industry.

E. Principal Sources of Data for Industry and Commodity Output and Prices—Continues

Industry and commodity	Source data for annual current-dollar statistics	Source data for price indexes
Agriculture, forestry, fishing and		
hunting Farms	New U.S. Department of Agriculture (USDA) data and national income and product account (NIPA) farm output for 2010, revised data for 2009 and 2008.	USDA prices received by farmer; Bureau of Labor Statistics (BLS) Producer Price Index (PPI).
Forestry, fishing and related activities	For forestry, new NIPA farm output for 2010, revised data for 2009 and 2008. For logging and forestry support activities, Census Bureau annual survey of manufactures (ASM) for 2008 and 2009, Census Bureau manufacturers' shipments, inventories and orders survey (M3) for 2010; for fishing, hunting and trapping, National Oceanic and Atmospheric Administration (NOAA) commercial landings and export value for 2008–2010.	BLS PPI; NIPA personal consumption expenditure (PCE) implicit price indexes; USDA/National Agricultural Statistics Service (NASS) unit prices.
Mining Oil and gas extraction	U.S. Department of Energy (DOE) Energy Information Administration (EIA) data on	BLS PPI; EIA.
Mining, except oil and gas	quantities produced and prices; 2008–2010. For coal mining, EIA U.S. Coal Supply and Demand in Review; for Uranium, EIA <i>Uranium Marketing Annual Report</i> , for all other, U.S. Geological Survey (USGS) <i>Mineral Commodity Summaries</i> ; 2008–2010.	EIA; USGS; and BLS PPI.
Support activities for mining	For mining exploration, trade source data on drilling costs and footage drilled; all other support activities, USGS <i>Mineral Commodity Summaries</i> , 2008–2010.	EIA; USGS; BLS PPI; and trade sources.
Utilities	For power generation and supply, EIA forms 861 and 826; for natural gas distribution, EIA <i>Natural Gas Monthly</i> new for 2010 revised for 2009 and 2008; for water, sewage and other systems, NIPA PCE water and sanitary services/maintenance; 2008–2010.	BLS Consumer Price Index (CPI); BLS PPI.
Construction Residential	New Census Bureau construction spending survey 2010, revised for 2009 and 2008.	Census Bureau price deflator for new single-family houses under construction; BEA price index for multi family home construction.
Non residential	New Census Bureau construction spending survey 2010, revised for 2009 and 2008; U.S. Department of Defense (DOD) expenditures; USDA expenditures.	BEA composite price indexes based on cost per square foot and cost indexes from trade source data and Census Bureau price deflator for single-family houses under construction; BLS PPI.
Manufacturing	Shipments and inventories data from Census Bureau M3 for 2010, ASM and Census Bureau Nonemployer Survey for 2008 and 2009.	BLS PPI; NIPA price indexes based on DOD prices paid for military equipment; NIPA hedonic price indexes.
Wholesale trade	Census Bureau Monthly Wholesale Trade Survey (MWTS) for 2010, Census Bureau Annual Wholesale Trade Survey (AWTS) data for 2008 and 2009.	BLS PPI
Retail trade	Census Bureau <i>Monthly Retail Trade Survey</i> (MRTS) for 2010; Census Bureau <i>Annual Retail Trade Survey</i> (ARTS) data for 2003–2009.	BLS PPI
Transportation and warehousing Air transportation	New Bureau of Transportation Statistics (BTS) Air Carrier Financial Statistics (ACFS)	BLS PPI; BTS price deflators, NIPA price indexes.
Rail transportation Water transportation	and Air Carrier Traffic Statistics (ACTS); and foreign trade statistics. For rail passenger, <i>Amtrak Annual Report 2010</i> , for rail freight, trade sources. For freight, Army Corps of Engineers' <i>Waterborne Commerce of the United States</i> for 2010; for inland passenger travel on ferry boats, American Public Transportation Association (APTA) 2008–2009, and cruise ships, NIPA PCE 2010;	For rail passenger BLS CPI, for freight BLS PPI. BLS PPI; BLS CPI; trade source data.
Truck transportation	and trade source data on receipts 2008–2009. Census Bureau Service Annual Survey (SAS), preliminary for 2010 and revised for 2003–2009.	BLS PPI.
Transit and ground passenger transportation	BTS' National Transportation Statistics (NTS) 2009 and 2008; BLS, quarterly census of employment and wages (QCEW) data; PCE for ground passenger transportation 2008–2010.	PCE price indexes; QCEW data; BLS PPI.
Pipeline transportation	Trade source data on receipts 2008–2009; Federal Energy Regulatory Commission (FERC) form 6 2008–2009, EIA, Natural gas annual 2008–2010.	BLS PPI.
Other transportation and support activities	PCE 2010; trade source data on receipts 2008–2009; ACFS and ACTS for 2008.	PCE; BLS PPI.
Warehousing and storage Information	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009.	BLS PPI.
Publishing industries (includes software)	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009.	BEA price index for software; BLS PPI.
Motion picture and sound recording industries	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009.	PCE price indexes based on BLS CPI.
Broadcasting and telecommunications	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009.	BLS PPI.
Information and data processing services Finance and insurance	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009.	PCE price indexes for information services; BLS PPI for data processing services.
Federal Reserve banks, credit intermediation and related activities	Federal Deposit Insurance Corporation (FDIC) commercial bank call report data; Federal Reserve Board (FRB) data; National Credit Union Administration (NCUA); Office of Thrift Supervision (OTS) data; BEA measures of financial services indirectly measured; private trade source data 2008–2010.	PCE implicit price deflators for financial services implicitly measured based on BLS quantity output indexes for commercial banks and employee hours for other depository institutions; BLS PPI and CPI; FRB Priced services.
Securities, commodity contracts, investments	Securities and Exchange Commission (SEC) Focus Report for 2010; Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009; BLS QCEW data for auxiliary industries.	BLS PPI; PCE price indexes based on BLS CPI and BLS PPI.
Insurance carriers and related activities	For property and casualty insurance, life insurance, and reinsurance: private trade source data and BLS QCEW data 2008–2010. For medical and hospitalization insurance: private trade source data and US Department of Health and Human Services' <i>Medical Expenditure Panel Survey (MEPS)</i> 2004–2010.	BLS PPI; PCE price indexes based on quantity extrapolations of property insurance premiums and benefits deflated with BLS CPI, composite input cost indexes for life insurance; quantity extrapolation of premium and benefits deflated with BLS PPI for medical insurance.

E. Principal Sources of Data for Industry and Commodity Output and Prices—Table Ends

Industry and commodity	Source data for annual current-dollar statistics	Source data for price indexes
Funds, trusts, and other financial vehicles	NIPA imputed service charges for other financial institutions, Employee Benefits Security Administration (EBSA) data on pension funds; 2008–2010.	BLS PPI and PCE price indexes based on quantity indexes for mutual funds sales deflator with BLS CPI.
Real estate and rental and leasing		
Real estate	For residential dwellings, NIPA Housing Data; USDA data on farm housing; for nonresidential dwellings, new Internal Revenue Service (IRS) tabulations of business tax returns for 2009; NIPA rental value of buildings owned by nonprofits, Balance of Payments exports data.	For residential dwellings, PCE Price Index for residential rents, NIPA farm rents paid; BLS CPI based deflator; for nonresidential dwellings, BLS PPI; for real estate managers and agents, BLS PPI and trade source data.
Rental and leasing services and lessors of intangible assets	For rental and leasing services, Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009; for royalties, new IRS tabulations of business tax returns for 2009, revised 2008 data.	BLS PPI; BTS and construction index, mining, crude oil, receipts.
Professional, scientific, and technical services		
Legal services	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009.	BLS PPI; BEA PCE.
Computer systems design and related services	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009.	BEA price indexes for prepackage custom and own account software.
Miscellaneous professional, scientific and technical services	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009.	BLS PPI; BLS QCEW; BEA PCE.
Management of companies and enterprises	BLS QCEW data 2008–2010.	BLS QCEW data.
Administrative and waste management services		
Administrative and support services	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009; BLS QCEW data for auxiliary industries.	BLS QCEW; BLS PPI.
Waste management and remediation services	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009; BLS QCEW data for auxiliary industries.	BLS QCEW; BLS PPI.
Educational services	PCE data for education services based on data from the Department of Education and data from BLS consumer expenditure survey; 2008–2010.	PCE price index based on trade source data for input costs.
Health care and social assistance		
Ambulatory health care services	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009.	PCE price index based on BLS CPI; BLS PPI.
Hospital and nursing and residential care facilities	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009.	PCE price index based on BLS CPI and Centers for Medicare and Medicaid services.
Social assistance	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009.	PCE price index based on trade source data on input costs.
Arts, entertainment, and recreation	Our and Division and State on OAO data for OAAO and an incident data for OAOO OAOO	DOE nation in death are all on DLO ODI
Performing arts, spectator sports, museums and related industries	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009.	PCE price index based on BLS CPI.
Amusement, gambling, and recreation industries	Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009.	PCE price index based on BLS CPI.
Accommodation and food services		
Accommodations	PCE for hotels and motels; for RV Parks and Bed and Breakfasts, BLS QCEW data; 2008–2010.	BLS PPI; PCE price index based on BLS CPI.
Food services and drinking places	Census Bureau (ARTS); 2003–2010.	ARTS; BLS PPI.
Other services, except government	For religious, grant making, civic and other non profits services, and personal services, and dry cleaning services, Census Bureau preliminary SAS data for 2010 and revised data for 2003–2009 and data from the National Center for Charitable Statistics (NCCS); for repair and maintenance, BLS QCEW; for private household services, PCE data.	BLS CPI; PCE price indexes based on BLS CPI.
Federal		
General government	NIPA government expenditure statistics; for federal structures, DOD investment expenditures data; 2008–2010.	NIPA price index based on BLS PPI and BLS CPI; for military facilities DOD data on employment, prices for military construction, construction cost indexes from trade sources.
Government enterprises	U.S. Postal Service (USPS) receipts; EIA data for electric utilities, Overseas Private Investment Corporation (OPIC), Federal Housing Administration data (FHA). Government agency data for specific federal enterprises; 2008–2010.	BLS PPI; PCE price indexes based on BLS PPI and agency data.
State and local		
General	NIPA government expenditure statistics; 2008–2010.	BLS PPI; PCE price index based on CPI.
Enterprises	NIPA statistics on government enterprises based on annual survey of government finances; Alaska Railroad Administration for Alaska ferries, waterports, and airports; EIA data for electric utilities; state and local structures Census Bureau construction survey; 2008–2010.	BLS PPI.

F. Principal Sources of Data for Value-Added Extrapolators—Continues

			Industrial distribution
Component of gross domestic income	Major source data	Distribution available in source data	Data or assumption used if distribution by establishment is not available in source data
Compensation of employees, paid Wages and salary accruals 1 Supplements to wages and salaries	For most private industries, federal government civilians, and state and local government, Bureau of Labor Statistics (BLS) tabulations from the Quarterly Census of Employment and Wages (QCEW) for 2008–2010. For other private, a variety of sources for 2008–2010. For military wages, Office of Personnel Management (OPM) for 2008–2010.	Establishment.	
Employer contributions for employee pension and insurance funds	For health insurance, Department of Health and Human Services (HHS) Medical Expenditure Panel Survey for 2008–2010. For private pension plans, Pension Benefit Guaranty Corporation and corporate financial data for 2009 and 2010; Department of Labor (DOL) tabulations of Internal Revenue Service (IRS) Form 5500 for 2008. For federal retirement plans, outlays from <i>Monthly Treasury Statement;</i> for state and local government plans, Census Bureau annual surveys, for 2008–2010. For other types, judgmental trend for 2010; trade association data for 2008 and 2009.	For pension plans, company; for the others, none.	BLS employer cost index; BLS QCEW.
Employer contributions for government social insurance	Tabulations from the Social Security Administration (SSA) and other agencies administering social insurance programs for 2008–2010.	None.	SSA and BLS tabulations.
Taxes on production and imports less subsidies			
Taxes on production and imports	For state and local government, Census Bureau data for 2008–2010. For federal government excise taxes, Alcohol and Tobacco Tax and Trade Bureau collections and IRS data for 2008–2010. For customs duties, Treasury Department <i>Monthly Treasury Statement</i> for 2008–2010.		
Subsidies	For federal government, U.S. Department of Agriculture (USDA) Commodity Credit Corporation subsidy payments and Office of Management and Budget (OMB) of the United States for 2008–2010. For state and local government, Census Bureau and California administrative records for 2008–2010.	None.	Payments are assigned to the industries being supported.
Gross operating surplus Private enterprises Net interest and miscellaneous payments, domestic industries			
Corporate	Federal Financial Institutions Examination Council (FFIEC) <i>Call Reports</i> data on commercial banks and trade association data for 2008–2010. IRS tabulations from corporate tax returns (Form 1120 series), adjusted for misreporting on tax returns and for conceptual differences, for 2008 and 2009.	Company.	Census Bureau company- establishment employment matrix.
Noncorporate	FFIEC <i>Call Reports</i> data on commercial banks, Federal Reserve Board (FRB) mortgage debt times BEA interest rate for residential mortgage interest for 2008–2010. IRS tabulations of tax return data from sole proprietorships (Form 1040 Schedule C) and partnerships (Form 1065), adjusted for misreporting on tax returns and for conceptual differences, for 2008 and 2009.	Company.	Assumed to be equivalent to an establishment distribution.
Business current transfer payments (net)	For government, OMB <i>Budget of the United States</i> , Census Bureau Census of Governments and annual surveys for 2008–2010. For persons, judgmental trend for 2010. IRS tabulations from business tax returns and information from government agency reports and trade sources for 2008 and 2009.	Company.	Industry-specific payments are assigned to those industries; others are based on IRS company industry distribution.
Proprietors' income with inventory valuation adjustment (IVA) and without capital consumption adjustment (CCAdj)	110014		
Farm Nonfarm	USDA farm income data for 2008–2010.	Establishment.	
Proprietors' income without IVA and CCAdj	Indicators of activity, such as construction spending (value put in place), for construction, trade, and services for 2010. For others, judgmental trend for 2010. IRS tabulations of tax returns from sole proprietorships (Form 1040 Schedule C) and partnerships (Form 1065), adjusted for misreporting on tax returns and for conceptual differences, for 2008 and 2009.	Company.	Assumed to be equivalent to an establishment distribution.
IVA	BLS prices for 2008–2010. Census Bureau monthly surveys and <i>Quarterly Financial Report</i> for 2010; IRS inventory data for 2008 and 2009.	Establishment/ company.	
Rental income of persons without CCAdj	Census Bureau data on housing units and rents from the American Housing Survey, FRB mortgage debt data, BEA interest rate data, and USDA data for 2008–2010. For royalties, judgmental trend for 2010, IRS tabulations of data from individual tax returns (Form 1040) for 2008–2009.	Establishment.	

F. Principal Sources of Data for Value-Added Extrapolators—Table Ends

			Industrial distribution
Component of gross domestic income	Major source data	Distribution available in source data	Data or assumption used if distribution by establishment is not available in source data
Corporate profits before tax with IVA and without CCAdj, domestic industries			
Corporate profits before tax without IVA and CCAdj	Census Bureau data from the <i>Quarterly Financial Report</i> , regulatory agency reports, and public financial statements for 2010. IRS tabulations from corporate tax returns (Form 1120 series), adjusted for misreporting on tax returns and for conceptual differences, for 2008 and 2009.	Company.	Census Bureau company- establishment employment matrix.
IVA	BLS prices for 2008–2010. Census Bureau monthly surveys and <i>Quarterly Financial Report</i> for 2010; IRS inventory data for 2008 and 2009.	Establishment/ company.	. ,
Capital consumption allowances	, , , , , , , , , , , , , , , , , , ,		
Corporate	BEA estimates of tax-return-based depreciation for 2010. IRS tabulations from corporate tax returns (Form 1120 series), adjusted for misreporting on tax returns and for conceptual differences, for 2008 and 2009.	Company.	Census Bureau company- establishment employment matrix.
Noncorporate	BEA estimates of tax-return-based depreciation for 2010. IRS tabulations of tax return data from sole proprietorships (Form 1040 Schedule C) and partnerships (Form 1065), adjusted for misreporting on tax returns and for conceptual differences, for 2008 and 2009.	Company.	Assumed to be equivalent to an establishment distribution.
Current surplus of government			
enterprises	For federal government, reports from various agencies and BEA consumption of fixed capital for 2008–2010. For state and local governments, Census Bureau surveys of government finances for 2008–2010.	Establishment.	
Consumption of fixed capital			
Households and institutions ²	Perpetual-inventory method, based on gross investment estimates and on investment prices for 2008–2010.	Establishment.	
Government	Perpetual-inventory method, based on gross investment estimates and on investment prices for 2008–2010.	Type of agency.	

^{1.} Includes wage and salary disbursements to the rest of the world and excludes wages and salaries received from the rest of the world.

^{2.} Consists of owner-occupied housing and non profit institutions primarily serving households.

The NIPA reconciliation item shows the differences between the Annual Industry Accounts (AIAs) and the National Income and Product Accounts (NIPAs) that result from the incorporation of source data in the AIAs that were not available to be incorporated in the NIPAs. These differences do not indicate future revisions to the NIPAs, which will reflect the incorporation of additional key source data.
 Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.

^{3.} Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accomodation, and food services; and other services,

except government.

4. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.

Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.
 Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services,

except government.

3. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.

^{1.} Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The value of the "Not allocated by industry" line reflects the difference between the first line and the sum of the most detailed lines, as well as the differences in source data used to estimate GDP by industry and the expenditures measure of real GDP.

2. Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.

^{3.} Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services,

except government.

4. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.

Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.
 Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social assistance; arts, entertainment, recreation, accommodation, and food services; and other services,

except government.

3. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.

Subject Guide

Volume 91 January–December 2011

This guide lists the major items that were published in the Survey of Current Business in the January–December 2011 issues. It gives the month of the issue and the beginning page number, and it includes selected boxes that are cited by title and page number.

General

Schedule of BEA news releases in 2012

{November, 56 and December, 41}

Taking Account

BEA customers can use Twitter to stay informed {September, iv}

BEA economist looks at airline price strategies {March, iv}

BEA gets high marks in 2010 OAS survey {August, iv} Paper measures constant-quality drug prices {January, iv}

Web site upgrade: new look and data tools {July, iv}

BEA Briefings

Analyzing Federal Programs Using BEA Statistics: A Look at Unemployment Insurance Benefits Payments {September, 14}

Comparing NIPA Profits With S&P 500 Profits {March, 22}

GDP for American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands for 2002–2009 {September, 41}

Modernizing and Enhancing BEA's International Economic Accounts: A Progress Report {May, 26}
Feedback on Proposed Changes [box, 31]

Prototype Quarterly Statistics on U.S. Gross Domestic Product by Industry {July, 32}

Research Spotlights

Artistic Originals as Capital Assets {June, 43}

Offshoring and Import Price Measurement: Selected Research From the Conference on "Measurement Issues Arising From the Growth of Globalization" {February, 7}

Regional Price Parities by Expenditure Class for 2005–2009 {May, 73}

Technological Progress in the Microprocessor Industry {February, 13}

National

Fixed assets and consumer durable goods

For 1997–2010 {September, 27}

Inventories, sales, and inventory-sales ratios for manufacturing and trade

Third Quarter 2010 {January, 6}

Fourth Quarter 2010 {April, 9}

First Quarter 2011 {July, 6}

Fourth Quarter 2007 to Second Quarter 2011 {October, 9}

National income and product accounts (NIPAs)

Annual Revision

Annual Estimates for 2003–2010 and Quarterly Estimates for First Quarter 2003 to First Quarter 2011 {August, 6}

GDP and Other Major NIPA Series

For 1929 to the Second Quarter 2011 {August, 181}

NIPA Tables {August, 32}

Newly Available NIPA Tables

NIPA tables 3.15.1–3.15.6, 3.16, 3.17, and 7.15 {September, 19}

NIPA tables 3.18B and 3.20–3.23 {October, 6}

NIPA tables 2.9, 3.19, and 7.20 {November, 6}

GDP and the Economy

Advance Estimates

Fourth Quarter 2010 {February, 1}

First Quarter 2011 {May, 1}

Preview of the Upcoming Annual NIPA Revision {May, 6}

Second Quarter 2011 {August, 1}

Third Quarter 2011 {November, 1}

Second Estimates

Fourth Quarter 2010 {March, 1}

First Quarter 2011 {June, 1}

Second Quarter 2011 {September, 1}

Third Quarter 2011 {December, 1}

Third Estimates

Third Quarter 2010 {January, 1}

Fourth Quarter 2010 {April, 1}

First Quarter 2011 {July, 1}

Second Quarter {October, 1}

Government Receipts and Expenditures

Fourth Quarter 2010 {April, 6}

First Quarter 2011 {June, 11}

Second Quarter 2011 {September, 11}

Third Quarter 2011 {December, 11}

Returns for Domestic Nonfinancial Business (June, 24) Revisions to GDP, GDI, and Their Major Components {July, 9}

Trends in Consumer Spending and Personal Saving, 1959–2009 {June, 14}

Updated Summary of NIPA Methodologies {November, 9}

NIPA translation of the federal budget

For Fiscal Year 2012 {March, 12}

NIPA Estimates of the Federal Sector and the Federal Budget Estimates [box, 14]

Taking Account

Info about upcoming NIPA annual revision {June, iv} A look at cyclical economic indicators for the United States {February, iv}

Updated government statistical tables available {October, iv}

Industry

Industry accounts

Annual Industry Accounts

Advance Statistics on GDP by Industry for 2010

Revised Statistics for 2007–2009 {January, 9}

Revised Statistics for 2003–2010 {December, 15}

Travel and tourism satellite accounts

For 2007–2010 {June, 29}

Taking Account

Travel spending increases in the fourth quarter {April, iv}

International

Direct investment positions

Country and Industry Detail for 2010 {July, 125} Detailed Historical-Cost Positions and Related Financial and Income Flows for 2007–2009 {September,

Foreign direct investment in the United States

Operations of U.S. Affiliates of Foreign Companies in 2009 {August, 211}

Tables {September, 92}

U.S. direct investment abroad

Operations of U.S. Multinational Companies In 2009 {November, 29}

Tables {September, 57}

U.S. international investment position

Yearend 2010 {July, 113}

U.S. international accounts

Annual Revision {July, 47}

International Transactions and Positions in Financial Derivatives {July, 110}

U.S. international services

Cross-Border Trade in 2010 and Services Supplied Through Affiliates in 2009 (October, 13)

U.S. international transactions

An Ownership-Based Framework of the U.S. Current Account for 1999–2009 {January, 64}

Annual Estimates, 2010 (April, 20)

Ouarterly Estimates

Third Quarter 2010 {January, 30}

Fourth Quarter 2010 {April, 12}

First Quarter 2011 {July, 62}

Second Quarter 2011 (October, 58)

How BEA Aligns and Augments Source Data From the U.S. Treasury Department for Inclusion in the International Transactions Accounts (July, 44)

Taking Account

BEA publishes 2009 direct investment data {December,

BEA releases summary estimates of MNC activity

Results of BEA-BLS collaboration published {November, iv}

Regional

Gross domestic product by state

Advance Statistics for 2010 and Revised Statistics for 2007–2009 {July, 142}

Gross domestic product by metropolitan area

Advance Statistics for 2009 and Revised Statistics for 2001-2008 {March, 29}

Advance Statistics for 2010 and Revised Statistics for 2007–2009 {October, 93}

Local area personal income

For 2009 {May, 40}

Personal income for metropolitan areas

For 2010 {September, 139}

Regional quarterly reports

County Compensation by Industry for 2009 {January, 70}

State Personal Income

Annual Estimates

For 2010 {April, 53}

Quarterly Estimates

Third Quarter 2010 {January, 67}

Fourth Quarter 2010 {April, 49}

First Quarter 2011 {July, 171}

Second Quarter 2011 {October, 129}

December 2011 41

BEA Current and Historical Data

A selection of estimates from the national, industry, international, and regional accounts of the Bureau of Economic Analysis (BEA) are presented in this section. BEA's estimates are not copyrighted and may be reprinted without BEA's permission. Citing the Survey of Current Business and BEA as the source is appreciated.

More detailed estimates from BEA's accounts are available on BEA's Web site at www.bea.gov. These estimates are available in a variety of formats. In addition, news releases, articles, and other information, including methodologies and working papers, are available.

The tables present annual [A], quarterly [Q], and monthly [M] data.

D-2 December 2011

National Data

A. Selected NIPA Tables

The selected set of NIPA tables presents the most recent estimates of gross domestic product (GDP) and its components, which were released on November 22, 2011. These estimates include the second estimates for the third quarter of 2011. Also included are revised estimates of wages and salaries and of affected income-side series for the second quarter of 2011.

The selected set presents quarterly estimates that are updated monthly. Annual estimates are presented in most of the tables. Estimates for all NIPA series for 1929 forward are on BEA's Web site at www.bea.gov.

The GDP news release is available on BEA's Web site within minutes after the release. To receive an e-mail notification of the release, go to www.bea.gov and subscribe. The "Selected NIPA Tables" are available later that day.

Nore. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 currentdollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Estimates for durable goods and nondurable goods for 1996 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).
 Includes government consumption expenditures, which are for services (such as education and national defense) produced by government. In current dollars, these services are valued at their cost of production.
 Some components of final sales of computers include computer parts.

Food excludes personal consumption expenditures for purchased meals and beverages, which are classified in food services.
 Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

Nore. Percent changes for real estimates are calculated from corresponding quantity indexes presented in NIPA tables 1.1.3, 1.2.3, 1.4.3, and 1.7.3. Percent changes in price estimates are calculated from corresponding price indexes presented in NIPA tables 1.1.4, 1.6.4, and 2.3.4.

^{1.} Estimates for durable goods and nondurable goods for 1996 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).

2. Includes government consumption expenditures, which are for services (such as education and national defense) produced by government. In current dollars, these services are valued at their cost of production.

3. Some components of final sales of computers include computer parts.

Note. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line following change in private inventories is the difference between gross domestic product and the sum of final sales of domestic product and of change in private inventories; the residual line following structures is the difference between gross domestic product and the sum of the detailed lines of goods, of services, and of structures.

Equals gross domestic product excluding gross value added of households and institutions and of general government.
 Equals gross domestic business value added excluding gross farm value added.
 Equals compensation of employees of nonprofit institutions, the rental value of nonresidential fixed assets owned and used by nonprofit institutions serving households, and rental income of persons for tenant-occupied houseing owned by nonprofit institutions.
 Equals compensation of general government employees plus general government consumption of fixed capital.

inventories	5	-144.9	58.8	92.3	38.3	49.1	39.1	-8.5			
Equals: Final sales to domestic purchasers	6	13,200.0	13,440.7	13,495.4	13,585.9	13,598.4	13,643.4	13,744.0			
Addendum: Final sales of domestic product	7	12,852.7	13,028.9	13,046.0	13,181.6	13,182.8	13,236.2	13,353.9			

Note. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

ment.

2. Equals gross domestic business value added excluding gross farm value added.

3. Equals compensation of employees of nonprofit institutions, the rental value of nonresidential fixed assets owned and used by nonprofit institutions serving households, and rental income of persons for tenant-occupied housing owned by nonprofit institutions.

4. Equals compensation of general government employees plus general government consumption of fixed capital.

Nora: Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
 Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
 Sexcludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
 Excludes software "embedded," or bundled, in computers and other equipment.

Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
 Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).

	•									

Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
 Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
 Sexcludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
 Excludes software "embedded," or bundled, in computers and other equipment.

Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
 Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).

Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
 Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
 Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
 Excludes software "embedded," or bundled, in computers and other equipment.

^{1.} Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. The quantity index for computers can be used to accurately measure the real growth of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 1.5.2 and real growth rates are shown in table 1.5.1.
5. Excludes software "embedded," or bundled, in computers and other equipment.
Note. The residual line is the difference between the first line and the sum of the most detailed lines.

^{1.} Gross domestic income deflated by the implicit price deflator for gross domestic product.
2. Gross national income deflated by the implicit price deflator for gross national product.
3. Net domestic income deflated by the implicit price deflator for gross national product.
Noтe. Except as noted in footnotes 1, 2 and 3, chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive.

Deflator is the gross domestic purchases price index.
 This measure is called "real gross domestic income" in the System of National Accounts, 2008.
 This measure is called "real gross national income" in the System of National Accounts, 2008.
 Deflator is the net domestic purchases price index.

Uses gross domestic purchases price index as deflator.
 This measure is called "real gross domestic income" in the System of National Accounts, 2008.
 This measure is called "real gross national income" in the System of National Accounts, 2008.
 Uses net domestic purchases price index as deflator.
 Ratio (multiplied by 100) of price index for gross domestic product to the price index for gross domestic purchases.

Ratio (multiplied by 100) of the price index for exports of goods and services to the price index for imports of goods and services.
 Ratio (multiplied by 100) of the price index for goods exports to the price index for goods imports.
 Ratio (multiplied by 100) of the price index for goods exports to the price index for nonpetroleum goods imports.

Estimates for financial corporate business and nonfinancial corporate business for 2000 and earlier periods are based on the 1987 Standard Industrial Classification (SIC); later estimates for these industries are based on the North American Industry Classification System (NAICS).

2. The current-dollar gross value added is deflated using the gross value added chain-type price index for nonfinancial industries from the GDP-by-industry accounts. For periods when this price index is not available, the chain-type price index for GDP goods and structures is used.

3. Chained-dollar consumption of fixed capital of nonfinancial corporate business is calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100.

4. Chained-dollar net value added of nonfinancial corporate business is the difference between the gross product and the consumption of fixed capital.

^{1.} Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the federal old-age and survivors insurance trust fund and the disability insurance trust fund.

2. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the federal hospital insurance trust fund and the supplementary medical insurance trust fund.

3. Consists of nonmortgage interest paid by households.

4. The current-dollar measure is deflated by the implicit price deflator for personal consumption expenditures.

Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
 Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
 Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
 Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
 Consists of gasoline and other energy goods and of electricity and gas services.
 Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
 Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
 Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
 Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.

^{5.} Consists of gasoline and other energy goods and of electricity and gas services.

6. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
 Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
 Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
 Food consists of load and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
 Consists of gasoline and other energy goods and of electricity and gas services.
 Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
 Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
 Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
 Food consists of load and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
 Consists of gasoline and other energy goods and of electricity and gas.
 Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

1. Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
5. Consists of gasoline and other energy goods and of electricity and gas.
6. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

Note: Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Market-based PCE excluding food and energy ⁶		1.9	1.0	1.0	0.3	1.3	2.4	2.3

^{1.} Net expenses of NPISHs, defined as their gross operating expenses less primary sales to households.
2. Gross output is net of unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; excludes own-account investment (construction and software).
3. Excludes unrelated sales, secondary sales, and sales to business, to government, and to the rest of the world; includes membership dues and fees.
4. Food consists of food and beverages purchased for off-premises consumption; food services, which include purchased meals and beverages, are not classified as food.
5. Consists of gasoline and other energy goods and of electricity and gas.
6. Market-based PCE is a supplemental measure that is based on household expenditures for which there are observable price measures. It excludes most imputed transactions (for example, financial services furnished without payment) and the final consumption expenditures of nonprofit institutions serving households.

Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account

investment (construction and software).

2. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

ment that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

Note: Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

investment (construction and software).

2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account

investment.

4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

 ^{1.} Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government of tixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.

4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

^{1.} Government consumption expenditures are services (such as education and national defense) produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

these assets.

3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.

4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software in table 3.9.5.

Nors. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

^{1.} National defense consumption expenditures are defense services produced by government that are valued at their cost of production. Excludes government sales to other sectors and government own-account investment (construction and software).

2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

and soliwarle).

2. Consumption of fixed capital, or depreciation, is included in government gross output as a partial measure of the services of general government fixed assets; the use of depreciation assumes a zero net return on these assets.

3. Includes general government intermediate inputs for goods and services sold to other sectors and for own-account

Investment.
4. Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.

^{3.} Includes general government intermediate inputs for goods and services sold to other sectors and for own-account investment.

4. Own-account investment is measured in current dollars by compensation of general government employees and

^{4.} Own-account investment is measured in current dollars by compensation of general government employees and related expenditures for goods and services and is classified as investment in structures and in software.
5. Gross government investment consists of general government and government enterprise expenditures for fixed assets; inventory investment is included in government consumption expenditures.
Nore. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

^{1.} Exports and imports of certain goods, primarily military equipment purchased and sold by the federal government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to services.

2. Consists of capital transfers and the acquisition and disposal of nonproduced nonfinancial assets. Prior to 1982, reflects only capital grants paid to the U.S. territories and the Commonwealths of Puerto Rico and Northern Mariana Islands.

		, .=	,	,	,	,	,	,

^{1.} Exports and imports of certain goods, primarily military equipment purchased and sold by the federal government, are included in services. Beginning with 1986, repairs and alterations of equipment are reclassified from goods to

services.

2. Includes parts of foods, feeds, and beverages, of nondurable industrial supplies and materials, and of nondurable nonautomotive consumer goods.

are included in services. Beginning with 1986, repairs and alterations of equipment are replassing from 5000 to services.

2. The quantity index for computers can be used to accurately measure the real growth of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 4.2.2 and real growth rates are shown in table 4.2.1.

3. Includes parts of foods, feeds, and beverages, of nondurable industrial supplies and materials, and of nondurable accuratemative consumer nonds.

^{3.} Includes parts of todos, feeds, and beverages, of nondurable industrial supplies and materials, and of nondurable nonauthomotive consumer goods.
Note: Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. For exports and for imports, the residual line is the difference between the aggregate line and the sum of the most detailed lines.

- Consists primarily of religious, educational, vocational, lodging, railroads, farm, and amusement and recreational structures, net purchases of used structures, and brokers' commissions on the sale of structures.
 Excludes software "embedded", or bundled, in computers and other equipment.
 Includes communication equipment, nonmedical instruments, medical equipment and instruments, photocopy and related equipment, and office and accounting equipment.
 Consists primarily of furniture and fixtures, agricultural machinery, construction machinery, mining and oiffield machinery, service industry machinery, and electrical equipment not elsewhere classified.
 Consists primarily of manufactured homes, improvements, dormitories, net purchases of used structures, and brokers' commissions on the sale of residential structures.
 Excludes net purchases of used structures and brokers' commissions on the sale of structures.

^{1.} Consists primarily of religious, educational, vocational, lodging, railroads, farm, and amusement and recreational structures, net purchases of used structures, and brokers' commissions on the sale of structures.

2. The quantity index for computers can be used to accurately measure the real growth rate of this component. However, because computers exhibit rapid changes in prices relative to other prices in the economy, the chained-dollar estimates should not be used to measure the component's relative importance or its contribution to the growth rate of more aggregate series; accurate estimates of these contributions are shown in table 5.3.2 and real growth rates are shown in table 5.3.1 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates are shown in table 5.3.2 and real growth rates of these contributions are shown in table 5.3.2 and real growth rates of these contributions are shown in table 5.3.2 and real growth rates are shown in table 5.3.1 and real growth rates of these contributions are shown in table 5.3.2 and real growth rates of these contributions are shown in table 5.3.2 and real growth rates of these contributions are shown in table 5.3.2 and real growth rates of these contributions are shown

^{1.} This series is derived from the Census Bureau series "current cost inventories."
2. The inventory valuation adjustment (IVA) shown in this table differs from the IVA that adjusts business incomes. The IVA in this table reflects the mix of methods (such as first-in, first-out) and last-in, first-out) underlying inventories derived primarily from Census Bureau statistics (see footnote 1). This mix differs from that underlying business income derived primarily from Internal Revenue Service statistics.

Note. Estimates in this table are based on the North American Industry Classification System (NAICS).

Nore. Estimates in this table are based on the North American Industry Classification System (NAICS).
Chained (2005) dollar series for real change in private inventories are calculated as the period-to-period change in chained-dollar end-of-period inventories. Quarterly changes in end-of-period inventories are stated at annual rates. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines.

Nonfarm inventories to final sales of goods and structures		4.40	4.42	4.60	4.63	4.54

^{1.} Inventories are as of the end of the quarter. The quarter to-quarter change in inventories calculated from current-dollar inventories in this table is not the current-dollar change in private inventories component of GDP. The former is the difference between two inventory stocks, each valued at its respective end-of-quarter prices. The latter is the change in the physical volume of inventories valued at average prices of the quarter. In addition, changes calculated from this table are at quarterly rates, whereas, the change in private inventories is stated at annual rates.

2. Quarterly totals at monthly rates. Final sales of obmestic business equals final sales of domestic product less gross output of general government, gross value added of nonprofit institutions, compensation paid to domestic workers, and imputed rental of owner-occupied nonfarm housing. It includes a small amount of final sales by farm and by government enterprises.

Note. Estimates in this table are based on the North American Industry Classification System (NAICS).

2. Quarterly totals at monthly rates. Final sales of domestic business equals final sales of domestic product less gross output of general government, gross value added of nonprofit institutions, compensation paid to domestic workers, and imputed rental of owner-occupied nonfarm housing. It includes a small amount of final sales by farm and by government enterprises.

Norz. Estimates in this table are based on the North American Industry Classification System (NAICS).

Chained (2005) dollar inventory series are calculated to ensure that the chained (2005) dollar change in inventories for 2005 equals the current-dollar change in inventories for 2005 and that the average of the 2004 and 2005 end-of-year chain-weighted and fixed-weighted inventories are equal.

^{1.} Consists of finance and insurance and bank and other holding companies.
2. Consists of credit intermediation and related activities; securities, commodity contracts, and other financial investments and related activities; insurance carriers and related activities; funds, trusts, and other financial vehicles; and bank and other holding companies.
3. Consists of wood products; nonmetallic mineral products; primary metals; other transportation equipment; furniture and related products; and miscellaneous manufacturing.
4. Consists of textile mills and textile product mills; apparel; leather and allied products; paper products; printing and related support activities; and plastics and rubber products.
5. Consists of agriculture, forestry, fishing, and hunting; mining; construction; real estate and rental and leasing; professional, scientific, and technical services; administrative and waste management services; educational services; health care and social assistance; arts, entertainment, and recreation; accommodation and food services; and other services, except government.

Note. Estimates in this table are based on the 2002 North American Industry Classification System (NAICS).

Consists of used light trucks only.
 Consists of final sales and change in private inventories of new autos assembled in the United States.
 Consists of sales of imported new autos in personal consumption expenditures, in private fixed investment, and in gross government investment.

Consists of used light trucks only.
 Consists of final sales and change in private inventories of new autos assembled in the United States.
 Consists of sales of imported new autos in personal consumption expenditures, in private fixed investment, and in gross government investment.
 Nors. Chained (2005) dollar series are calculated as the product of the chain-type quantity index and the 2005 current-dollar value of the corresponding series, divided by 100. Because the formula for the chain-type quantity indexes uses weights of more than one period, the corresponding chained-dollar estimates are usually not additive. The residual line is the difference between the first line and the sum of the most detailed lines, excluding the lines in the addenda.

1. Social security benefits include old-age, survivors, and disability insurance benefits that are distributed from the
1. Social security benefits include old-age, survivors, and disability insurance trust fund.
2. Medicare benefits include hospital and supplementary medical insurance benefits that are distributed from the

federal hospital insurance trust fund and the supplementary medical insurance trust fund.

3. Consists of nonmortgage interest paid by households.

4. Equals disposable personal income deflated by the implicit price deflator for personal consumption expenditures.

5. Population is the total population of the United States, including the Armed Forces overseas and the institutionalized population. The monthly estimate is the average of estimates for the first of the month and the first of the following month; the control estimate is the average of the months of the month and the first of the following month;

the annual estimate is the average of the monthly estimates. Source: U.S. Bureau of Economic Analysis.

C. Historical Measures

This table is derived from the "Selected NIPA Tables" that are published in this issue and from the "GDP and Other Major NIPA Series" tables that were published in the August 2011 issue. (The changes in prices are calculated from indexes expressed to three decimal places.)

Table C.1. GDP and Other Major NIPA Aggregates—Continues

[Quarterly estimates are seasonally adjusted at annual rates]

December 2011 D-57

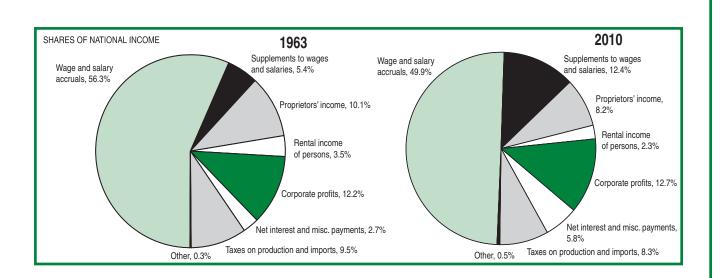

D. Charts

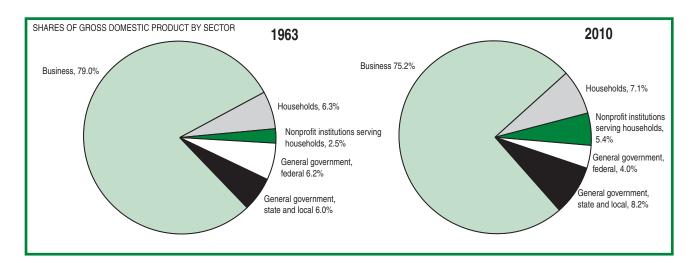

All series are seasonally adjusted at annual rates. The percent changes in real gross domestic product are based on quarter-to-quarter changes. The shaded areas mark the beginning and end of recessions as determined by the Business Cycle Dating Committee of the National Bureau of Economic Research.

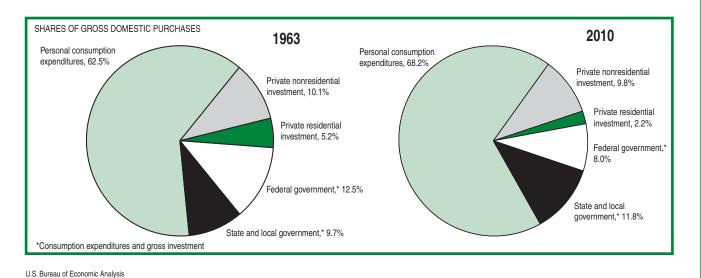

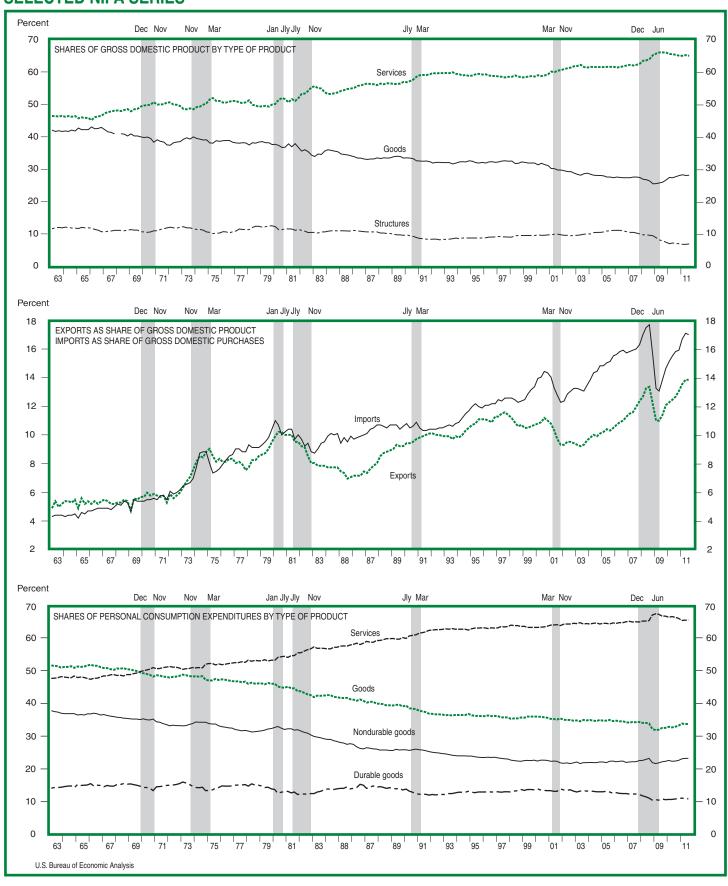

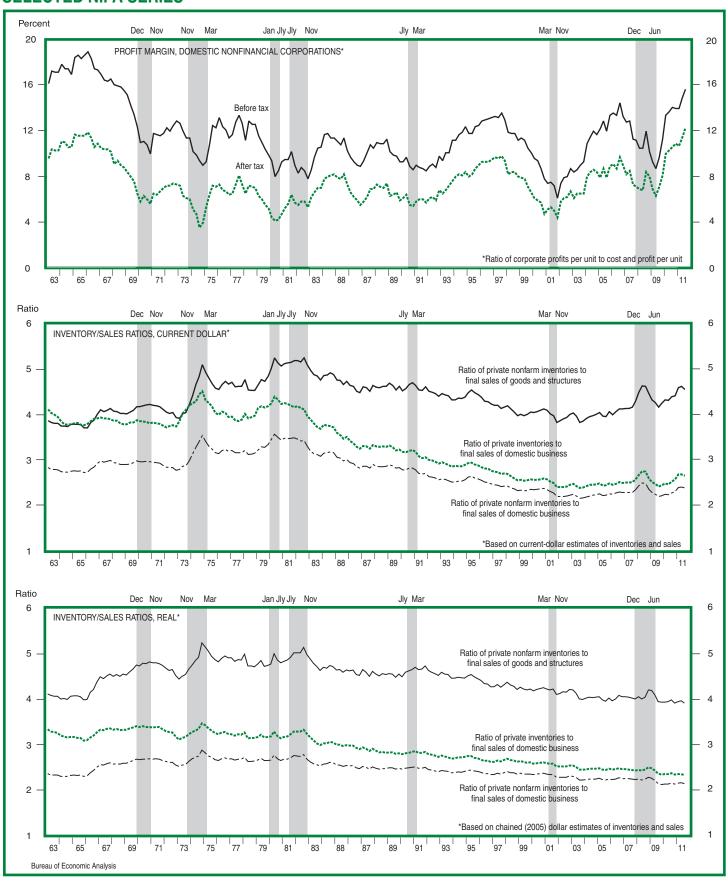

December 2011 D-63

Industry Data

E. Industry Table

The statistics in this table were published in tables 3a and 5a in "Annual Industry Accounts: Revised Statistics for 2003–2010" in the December 2011 Survey of Current Business.

Table E.1. Percent Changes in Chain-Type Quantity and Price Indexes for Value Added by Industry for 2008–2010

Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.
 Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional and business services; educational services, health care, and social

assistance; arts, entertainment, recreation, accommodation, and food services; and other services, except government.

3. Consists of computer and electronic products; publishing industries (includes software); information and data processing services; and computer systems design and related services.

D-64 December 2011

International Data

F. Transactions Tables

Selected U.S. international transactions tables are presented in this section. For BEA's full set of detailed estimates of U.S. international transactions, visit BEA's Web site at www.bea.gov.

Preliminary
r Revised
(*) Transactions are less than \$500,000 (+/-)
1. Details not shown separately; see totals in lines 56 and 63.

Details not shown separately are included in line 69.
 S. Estimates of financial derivatives for Mexico are included in Latin America and Other Western Hemisphere; and for China and India, in Asia and Pacific. Estimates for the Middle East are combined with estimates for Asia and Pacific.
 Calculated excluding financial derivatives, net (line 70).

p Preliminary
r Revised
1. Royalties and license fees and "other private services" by detailed type of service include both affiliated and unaffiliated transactions.
2. Includes royalties, license fees, and other fees associated with intangible assets, including patents, trade secrets, and other proprietary rights, that are used in connection with the production of goods.

^{3.} Includes royalties, license fees, and other fees associated with copyrights, trademarks, franchises, rights to broadcast live events, software licensing fees, and other intellectual property rights.
4. Other services receipts (exports) include mainly film and television tape rentals and expenditures of foreign residents temporarily working in the United States. Payments (imports) include mainly expenditures of U.S. residents temporarily working abroad and film and television tape rentals.
5. These reflect the amount of premiums explicitly charged by, or paid to, insurers and reinsurers.

p Preliminary r Revised * Less than \$500,000 (+/-)

^{..} Not applicable

Represents gains or losses on foreign-currency-denominated assets and liabilities due to their revaluation at current exchange rates.
 Includes changes due to year-to-year shifts in the composition of reporting panels, primarily for bank and nonbank

^{2.} Includes changes due to year-to-year shifts in the composition of reporting panels, primarily for bank and nonbank estimates, and to the incorporation of more comprehensive survey results. Also includes capital gana dlosses of direct investment affiliates and changes in positions that cannot be allocated to financial flows, price changes, or exchange-rate changes.
3. Financial flows and valuation adjustments for financial derivatives are available only on a net basis, which is shown on line 2; they are not separately available for gross positive fair values and gross negative fair values of financial derivatives. Consequently, columns (a) through (d) on lines 4, 5, 24, and 25 are not available.
4. Data are not separately available for the three types of valuation adjustments; therefore, the sum of all three types is shown in column (d)

Reflects changes in the value of the official gold stock due to fluctuations in the market price of gold.
 Reflects changes in gold stock from U.S. Treasury sales of gold medallions and commemorative and bullion coins; also reflects replenishment through open market purchases. These demonetizations/monetizations are not included in international transactions financial flows.

international transactions financial flows.

7. Also includes paid-in capital subscriptions to international financial institutions and outstanding amounts of miscellaneous claims that have been settled through international agreements to be payable to the U.S. government over periods in excess of 1 year. Excludes World War I debts that are not being serviced.

8. Includes indebtedness that the borrower may contractually, or at its option, repay with its currency, with a third country's currency, or by delivery of materials or transfer of services.

9. Includes foreign-currency-denominated assets obtained through temporary reciprocal currency arrangements between the Federal Reserve System and foreign central banks. These assets are included in the investment position at the dollar value established at the time they were received, reflecting the valuation of these assets in the Federal Reserve System's balance sheet. The movement of exchange rates does not affect this valuation.

10. Includes U.S. government liabilities associated with military sales contracts and U.S. government reserve-related liabilities from allocations of special drawing rights (SDRs).

Regional Data

I. State and Regional Tables

The tables in this section include the most recent estimates of state personal income and gross domestic product by state. The sources of these estimates are noted.

The quarterly and annual estimates of state personal income and the estimates of gross domestic product by state are available online at www.bea.gov. For information on state personal income, e-mail reis@bea.gov; write to the Regional Economic Information System, BE-55, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202-606-5360. For information on gross domestic product by state, e-mail gdpbystate@bea.gov; write to the Regional Product Division, BE-61, Bureau of Economic Analysis, U.S. Department of Commerce, Washington, DC 20230; or call 202-606-5340.

r Revised

1. Percent change from preceding period was calculated from unrounded data.

Note. The personal income level shown for the United States is derived as the sum of the state estimates. It differs

from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

Source: Table 2 in the "Regional Quarterly Report" in the October 2011 Survey of Current Business

Table I.3. Disposable Personal Income and Per Capita Disposable Personal Income by State and Region

from the estimate of personal income in the national income and product accounts because of differences in coverage, in the methodologies used to prepare the estimates, and in the timing of the availability of source data.

Source: Table 3 in the "Regional Quarterly Report" in the October 2011 Survey of Current Business

r Revised

1. Percent change from preceding period was calculated from unrounded data.

Note. The personal income level shown for the United States is derived as the sum of the state estimates. It differs

Table I.4. Gross Domestic Product (GDP) by State for Industries, 2010

[Millions of dollars]

State and region	Rank of total GDP by state	Total	Natural resources and mining	Construction	Durable-goods manufacturing	Nondurable- goods manufacturing	Trade	Transportation and utilities	Information	Financial activities	Professional and business services	Education and health services	Leisure and hospitality	Other services	Government

Note. Totals shown for the United States differ from the national income and product account statistics of gross domestic product (GDP) because GDP by state excludes and national GDP includes the compensation of Federal civilian and military personnel stationed abroad and government consumption of fixed capital for military structures located abroad

and for military equipment, except office equipment. Also, GDP by state and national GDP have different revision schedules.

Source: This table reflects the GDP by state statistics for 2010 that were released on June 7, 2011.

D-80 December 2011

A. Additional Information About the NIPA Estimates

Statistical Conventions

Current-dollar GDP is a measure of the market value of goods, services, and structures that are produced in the economy in a particular period. The changes in current-dollar GDP can be decomposed into quantity and price components. Quantities, or "real" measures, and prices are expressed as index numbers with the reference year—at present, the year 2005—equal to 100.¹

The annual changes in quantities and prices are calculated using a Fisher formula that incorporates weights from 2 adjacent years. For example, the annual percent change in real GDP for 2006-2007 uses prices for 2006 and 2007 as weights, and the 2006–2007 annual percent change in the GDP price index uses quantities for 2006 and 2007 as weights. Because the Fisher formula allows for the effects of changes in relative prices and in the composition of output over time, the resulting quantity or price changes are not affected by the substitution bias that is associated with changes in quantities and prices calculated using a fixed-weighted formula. These annual changes are "chained" (multiplied) together to form time series of quantity and price indexes. The percent changes in the Fisher indexes are not affected by the choice of the reference year.

BEA also publishes implicit price deflators (IPDs), which are calculated as the ratio of the current-dollar value of a component to the chained-dollar value of the component, multiplied by 100. The values of an IPD are very close to the values of the corresponding "chain-type" price index.

The measures of real GDP and its major components are also presented in dollar-denominated form, designated "chained (2005) dollar estimates." For most series, these estimates are computed by multiplying the current-dollar value in 2005 by a corresponding quantity index number and then dividing by 100. For example, if a current-dollar GDP component equaled \$100 in 2005 and if real output for this component increased by 10 percent in 2006, then the chained (2005) dollar value of this component in 2006 would be \$110 (\$100 \times 1.10). The percent changes calculated from the chained (2005) dollar estimates and from the quantity indexes are the same; any differences will be small and due to rounding.

The chained-dollar values for the detailed GDP components will not necessarily sum to the chained-dollar estimate of GDP (or to any intermediate aggregate) in a table, because the relative prices that are used as weights for any period other than the reference year differ from those of the reference year. A measure of the effect of such

differences is provided by a "residual" line—the difference between the chained-dollar value of the main aggregate in the table and the sum of the most detailed components in the table. For periods close to the reference year, when the relative prices that are used as weights have usually not changed much, the residuals tend to be small, and the chained-dollar estimates can be used to approximate the contributions to growth and to aggregate the detailed estimates. For periods further from the reference year, the residuals tend to be larger, and the chained-dollar estimates are less useful for analyses of contributions to growth. In particular, for components for which relative prices are changing rapidly, the calculation of contributions based on chained-dollar estimates may be misleading even just a few years from the reference year. Thus, contributions derived from quantity indexes provide a better measure than contributions derived from chained-dollar estimates; contributions based on quantity indexes are shown in selected NIPA tables 1.1.2, 1.2.2, 1.5.2, 2.3.2, 3.9.2, 4.2.2, and 5.3.2.

For quarters and months, NIPA estimates are presented at annual rates, which show the value that would be registered if the rate of activity that is measured for a quarter or for a month were maintained for a full year. Annual rates are used so that periods of different lengths—for example, quarters and years—may be more easily compared. These annual rates are determined simply by multiplying the estimated rate of activity by 4 (for quarterly data) or by 12 (for monthly data).

For most quarterly NIPA estimates, *percent changes* in the estimates are also expressed at annual rates. Calculating these *changes* requires a variant of the compound interest formula:

$$r = \left[\left(\frac{x_t}{x_0} \right)^{m/n} - 1 \right] \times 100$$

where r is the percent change at an annual rate; x_t is the level of activity in the later period; x_0 is the level of activity in the earlier period; m is the periodicity of the data (for example, 1 for annual data, 4 for quarterly data, or 12 for monthly data); and n is the number of periods between the earlier periods and the later periods (that is, t-0).

Quarterly and monthly NIPA estimates are seasonally adjusted if necessary. Seasonal adjustment removes from the time series the average effects of variations that normally occur at about the same time and in about the same magnitude each year—for example, weather, holidays, and tax payment dates. After seasonal adjustment, cyclical and other short-term changes in the economy stand out more clearly.

B. Suggested Reading

The Bureau of Economic Analysis (BEA) has published a wealth of information about the methodologies that are used to prepare its national, industry, international, and regional accounts. Most of this information is available on BEA's Web site at www.bea.gov.

National accounts

The national accounts encompass the detailed estimates in the national income and product accounts (including gross domestic product) and the estimates of fixed assets and consumer durable goods.

National income and product accounts (NIPAs). This series of papers documents the conceptual framework of the NIPAs and the methodologies that are used to prepare the estimates.

Concepts and Methods of the U.S. National Income and Product Accounts

"Introductory Chapters 1–4" (2009)

"Chapter 5: Personal Consumption Expenditures" (2009)

"Chapter 6: Private Fixed Investment" (2010)

"Chapter 7: Change in Private Inventories" (2010)

"Chapter 8: Net Exports of Goods and Services" (2011)

"Chapter 9: Government Consumption Expenditures and Gross Investment (2011)

Corporate Profits: Profits Before Tax, Profits Tax Liability, and Dividends (2002)

An Introduction to National Income and Product Accounts (2007)

Measuring the Economy: A Primer on GDP and the National Income and Product Accounts (2007)

The following Survey articles describe the 2009 comprehensive revision of the NIPAs.

"Initial Results of the 2009 Comprehensive NIPA Revision" (August 2009)

"Improved Estimates of the National Income and Product Accounts: Results of the 2009 Comprehensive Revision" (September 2009)

Preview of the 2009 Comprehensive NIPA Revision Changes in Definitions and Presentations (March 2009)

New Classifications for Personal Consumption Expenditures (May 2008)

Statistical Changes (May 2009)

"Preview of the Revised NIPA Estimates for 2002: Effects of Incorporating the 2002 Benchmark I-O Accounts and Proposed Definition and Statistical Changes" (March 2008)

In addition, see the following articles.

"Annual Revision of the National Income and Product Accounts" (August 2011) presents revisions and describes any changes in the data and the methods used to prepare the estimates.

"Updated Summary of NIPA Methodologies" (November 2011) describes the source data and methods that are used to prepare the estimates.

"Chained-Dollar Indexes: Issues, Tips on Their Use, and Upcoming Changes" (November 2003) discusses the advantages of using chain-weighted indexes and the challenges of using chained dollars.

"Revisions to GDP, GDI, and Their Major Components" (July 2011) evaluates the principal NIPA estimates by examining the record of revisions to them.

"Gross Domestic Product: Revisions and Source Data" (February 2006) describes the categories of data that are used for the advance, preliminary (now called second), and final (now called third) quarterly estimates of GDP.

Fixed assets and consumer durable goods. Fixed Assets and Consumer Durable Goods in the United States, 1925–97 (2003) discusses the concepts and statistical considerations that underlie the estimates and their derivation.

"Fixed Assets and Consumer Durable Goods for 1997–2010" (September 2011) describes the improvements that were incorporated into these estimates as part of the 2011 annual NIPA revision.

Satellite account. This account extends the analytical capacity of the NIPAs by focusing on the effects of a particular aspect of economic activity on GDP.

"Research and Development Satellite Account"

For 1959–2002 (December 2006)

For 1959–2004 (October 2007)

For 1959–2007 (December 2010)

Mission Statement and Strategic Plan

The mission statement of the Bureau of Economic Analysis and its most recently updated strategic plan for improving the accuracy, reliability, and relevance of the national, industry, regional, and international accounts are available on BEA's Web site at www.bea.gov under "About BEA."

Industry accounts

The industry accounts consist of the annual industry accounts (the input-output accounts and the gross domestic product by industry accounts), the benchmark input-output accounts, and two satellite accounts.

Annual industry accounts. Measuring the Nation's Economy: An Industry Perspective (2011) provides an overview of these accounts and how they can be used to examine industry activity in the U.S. economy and to track the flow of goods and services throughout the economy.

Benchmark input-output accounts. *Concepts and Methods of the U.S. Input-Output Accounts* (September 2006) describes the concepts and methods that underlie the preparation of these accounts.

Satellite accounts. These accounts extend the analytical capacity of the input-output accounts by focusing on a particular aspect of economic activity.

"U.S. Travel and Tourism Satellite Accounts"

For 2004–2007 (June 2008)

For 2005–2008 (June 2009)

For 2004–2009 (November 2010)

For 2007–2010 (June 2011)

International accounts

The international accounts encompass the international transactions accounts and the international investment position accounts, direct investment, and international transactions in services.

International transactions accounts and international investment position accounts. "A Guide to the U.S. International Transactions Accounts and the U.S. International Investment Position Accounts" (February 2010) introduces these accounts.

U.S. International Transactions Accounts: Concepts and Estimation Methods (2011) describes the methodologies used to prepare the estimates. The methodology is usually updated and improved as part of the annual revisions of the international transactions accounts. The updated and improved methodology is described in a series of articles, the latest of which was published in the July 2011 Survey.

"Modernizing and Enhancing BEA's International Economic Accounts: A Progress Report" (May 2011) updates BEA's plans to introduce the new international statistical standards from recently updated manuals and its plans for changes that were included in the 2011 annual revision.

Direct investment. Updated methodologies are

available in U.S. Direct Investment Abroad: Final Results From the 2004 Benchmark Survey (2008) and in Foreign Direct Investment in the United States: Final Results From the 2002 Benchmark Survey (2006).

Additional improvements are described in the following annual articles: "Direct Investment Positions: Country and Industry Detail" (July) and "Operations of U.S. Multinational Companies" (August 2010) and "Operations of U.S. Affiliates of Foreign Companies" (August 2011).

International services. The methodology used to prepare the estimates is usually updated and improved in a series of articles, the latest of which was published in the October 2011 Survey.

"Selected Issues in the Measurement of U.S. International Services" (June 2002) describes key issues in defining and measuring insurance, wholesale and retail trade, finance, construction, and utilities services.

Regional accounts

The regional accounts include estimates of personal income and gross domestic product.

Personal income. Estimates of personal income are prepared for states and for local areas.

State Personal Income and Employment (2011) describes the detailed methodology that is used to prepare the quarterly and annual estimates for the states, the District of Columbia, the eight BEA regions, and the United States.

Local Area Personal Income and Employment (2011) describes the detailed methodology that is used to prepare the estimates for counties, metropolitan areas, metropolitan divisions, micropolitan areas, combined statistical areas, and BEA economic areas and regions.

Gross domestic product. Estimates of gross domestic product (GDP) are prepared for states and metropolitan areas.

Gross Domestic Product by State (2006) describes the sources and the methods that are used to prepare the estimates.

"Gross Domestic Product by State" (December 2010) presents the results of the most recent comprehensive revision.

"Introducing New Measures of the Metropolitan Economy: Prototype Estimates of GDP by Metropolitan Area" (November 2007) describes the potential uses of the estimates.
